

August 5, 2015

“*The Boone Dam Weekly Update*” is published each week to help keep TVA’s stakeholders informed on the activities associated with repairing the earthen embankment at Boone Dam. These updates and other information are available at TVA’s website: [Boone Repair](#) and via email distribution.

Boone Dam Repair Project Community Meeting Draws More Than 300 Attendees

TVA held a community meeting to provide details on the repair plan for the Boone Dam earthen embankment on July 30, 2015 in Johnson City. More than 300 area residents and business owners attended the public meeting. Following a presentation by TVA Vice President John McCormick, the public was invited to ask questions of McCormick along with two other TVA vice presidents, John Kammeyer and Rebecca Tolene.

A complete unedited transcript of the meeting and public questions and comments is posted on TVA’s website at: [Boone Repair](#). Also, earlier in the day, a press conference was held to brief the media on the repair plan. A video tape of the press conference is also available on the same webpage.

The TVA staff appreciates everyone’s attendance and comments at the meeting. The project team is working as efficiently and effectively as possible to complete the repair in a safe manner and as rapidly as possible.

For more details on the repair plan, visit [Boone Repair](#).

Test Grouting Program Underway

Work began this week on the Test Grouting Program for the earthen embankment. The testing will provide valuable information on the most effective type of grouting method for the final solution as well as a better understanding of geological conditions near the earthen embankment.

In the photo, workers are drilling bore holes prior to injecting grout into the earthen embankment.

NOTE: Due to the angle of the photo, the power lines appear within close proximity of the drill rig. The power lines are actually 48 feet from the drill mast.

Who to Call at TVA for Dock Permits

Boone Lake area residents looking to move or build docks can find complete information on TVA's website at: [Dock Permits](#) or by calling 423-467-3801.

Additional details on sample small construction project drawings, etc., are available at: [Small Construction Projects](#); and, the regulations governing lake access may be found at: [Permit Regulations](#).

Public Lands Information Center

TVA's Public Lands Information Center is your single source for answers to questions about a variety of TVA's public land topics. To access this service call 1-800-882-5263 between 8 a.m. and 6 p.m. Eastern time, Monday through Friday.

You can also submit questions via the website at: [TVA Public Lands Info](#).

How to Receive Regular Updates

If you'd like to be included on the Boone Update email distribution list, please visit [Boone Repair](#) and submit your email address where you see "Sign up below to get weekly updates via email".
