

Volume 1, No. 9
August 11, 2015

"The Boone Dam Weekly Update" is published each week to help keep TVA's stakeholders informed on the activities associated with repairing the earthen embankment at Boone Dam. These updates and other information are available at TVA's website: [Boone Repair](#) and via email distribution.

Updated Q&A Available on TVA's Website

A number of Tri-Cities area residents have submitted questions regarding the repair work and associated activities taking place at Boone Dam through the TVA website and at the July 30 public meeting. A complete list of these questions with answers are now available on the website at [Boone Repair](#).

A complete unedited transcript of the public meeting, including the questions, responses and comments, is also posted on the website.

Test Grouting Program in Second Week

Work began last week on the Test Grouting Program for the earthen embankment. The testing will provide valuable information on the most effective type of grouting method for the final solution. The test grouting is expected to continue until the end of 2015.

How to Receive Regular Updates

If you'd like to be included on the Boone Update email distribution list, please visit [Boone Repair](#) and submit your email address where you see "Sign up below to get weekly updates via email".
