

Volume 1, No. 17  
October 6, 2015

"The Boone Dam Weekly Update" is published each week to help us keep the community informed about the latest information on the repair project. These updates and other information are available at the [Boone Repair](#) website, by signing up for email or by following @boonerepair on Twitter.

### **Construction Update**

Construction activity is moving along at Boone Dam this week. Several lights and poles are now being removed in order to make way for creation of a wider work platform needed for future construction. Grouting work is also taking place around the original sinkhole found in October 2014.

### **Boone Reservoir Fishery Habitat Enhancement Project**

We are still getting inquiries about the Boone Reservoir Fishery Habitat Enhancement Project. The program will provide native plants that will help fish habitats when lake levels return, as well as providing erosion control during lower levels. If you are interested in participating, please call 423-467-3801 to provide your name, phone number and address to prepare for the beginning of the project early next year.

### **Reservoir Returns to 1352' Level**

We appreciate residents' patience over the weekend as we lowered the lake levels by two feet to prepare for potential heavy rains due to Hurricane Joaquin. Luckily, our region was spared the worst of the rain and the reservoir has now been returned to its recent level of 1352 feet.

### **How to Receive Regular Updates**

If you'd like to be included on the Boone Update email distribution list, please visit [Boone Repair](#) and submit your email address where you see "Sign up below to get weekly updates via email".
