TVA is Recruiting for Nuclear Student Generating Plant Operators

Built for the People

TVA provides electricity for 153 local power companies serving 10 million people in Tennessee and parts of six surrounding states, as well as directly to 57 large industrial customers and federal installations. TVA also provides flood control, navigation and land management for the Tennessee River system, and assists local power companies and regional governments with their economic development efforts.

TVA operates three Nuclear Power Plants that generate enough low-cost, clean, and reliable energy to power about a third of our customers—more than 4 million homes and businesses. With a top priority of safety and security, nuclear power is key to achieving TVA's mission of energy, environmental stewardship, and economic development to make life better for the Tennessee Valley.

TVA Benefits

- Employee Resource Groups
- Medical, Dental and Life Benefits
- Paid FMLA
- Maternity/Paternity Leave

Student Generating Plant Operator (SGPO)

If you like to see how complicated machinery works and operate equipment, then this program may be for you! This 1-1/2 year training program leads to the position of Assistant Unit Operator (AUO) at a Nuclear Power Plant.

The training consists of a combination of on-the-job training, classroom instruction and self-study. Assistant Unit Operators operate power station machinery, monitor in-plant parameters, and assist in testing of plant equipment.

TVA is looking for candidates with an Associates of Science in a technical field and/or documented industrial operating or power plant experience.
