

Welcome

Virtual Public Scoping Open House

Cumberland Fossil Plant Retirement Environmental Impact Statement

The purpose of this virtual open house is to inform the public that TVA is preparing an Environmental Impact Statement (EIS) for the retirement of the Cumberland Fossil Plant (CUF) and construction and operation of facilities to replace part of the retired generation.

TVA is requesting public input on alternatives being considered and environmental issues that should be addressed as part of this EIS.

TVA is hosting this open house virtually due to the ongoing COVID-19 pandemic. We thank you for your interest and hope you enjoy your time with us.
