Project Alternatives

Alternative C to include many (20+) solar and storage facilities, with a portion serving Middle TN transmission needs and the balance being distributed across the TVA system.
Alternative A

Retirement of CUF and construction and operation of a Combined Cycle Combustion Turbine (CC) Gas Plant on the CUF reservation
Alternative B

Retirement of CUF and construction and operation of two Simple Cycle Combustion Turbine (CT) Gas Plants at existing TVA sites.
Alternative C to include many (20+) solar and storage facilities, with a portion serving Middle TN transmission needs and the balance being distributed across the TVA system.

Retirement of CUF and construction and operation of Solar and Storage Facilities, primarily at alternate locations.
