

Renewal of Section 26a Form

March 17, 2022

Forms related to Section 26a applications represent information collection and must go through the Office of Management and Budget (OMB) review every 3 years in compliance with the Paperwork Reduction Act. The routine renewal process has begun, and a 60-day public notice has been issued in the Federal Register. [View the public notice.](#)

As part of this process, TVA is requesting approval of two new forms for floating cabin applications – Floating Cabin Electrical Certification Form and Floating Cabin Wastewater Discharge Certification Form. These forms allow TVA to collect information required under its existing Section 26a regulations regarding compliance with certain electrical and wastewater requirements.

TVA is not making any changes to the recently issued Section 26a regulations, nor is TVA imposing additional regulatory requirements; these forms will facilitate implementation of previously published Section 26a requirements.
