CHAPTER 1. INTRODUCTION

TVA manages approximately 293,000 acres of land along its reservoirs to protect the integrated operation of the TVA reservoir and power systems, to provide for appropriate public use and enjoyment of the reservoir system, and to ensure continuing economic growth in the Tennessee River Valley region (Valley). TVA prepares RLMPs to guide land use approvals, private water-use facility permitting, and resource management decisions on these reservoir lands.

In August 2000, TVA issued the *Tims Ford Reservoir Land Management and Disposition Plan¹ and Environmental Impact Statement* (TVA 2000), which examined the potential effects of several alternative methods to manage reservoir lands on Tims Ford Reservoir. In the 2025 Draft Tims Ford Reservoir Land Management Plan (Draft 2025 RLMP) and Environmental Assessment (Draft EA), four options are under consideration. Under Alternative A (the “no action” alternative), TVA would continue to manage its lands based on the 2000 Tims Ford Reservoir Land Management Plan (2000 RLMP)². Under all three proposed action alternatives, TVA would revise the 2000 RLMP and alter the land use allocations of 96 parcels in response to new issues and changes in conditions and circumstances that affect approximately 560.2 acres of the 4,685.5 ³acres (12.0 percent) of public lands managed by TVA on Tims Ford Reservoir in Franklin and Moore Counties in middle Tennessee.

TVA develops RLMPs using the Single Use Parcel Allocation methodology, which defines separate parcels of reservoir lands and allocates those parcels and affiliated land rights to one of the following land use categories or ‘zones’:

TVA Land Planning Zones

Zone 1 - Non-TVA Shoreland

Zone 2 - Project Operations

Zone 3 - Sensitive Resource Management

Zone 4 - Natural Resource Conservation

Zone 5 - Industrial

¹ For simplicity and consistency, the plan will be referred to as a Reservoir Land Management Plan or RLMP for the remainder of this document.

² Please note the 2000 did not use the same Land Planning Zones as used today. Under Alternative A, allocations would be converted to current Land Planning Zones.

³ 2000 RLMP acreage differs from the current acreage because both State lands and TVA lands were planned previously. Only TVA lands will be planned in the current effort.

Zone 6 - Developed Recreation

Zone 7 - Shoreline Access

Zone 8 – Conservation Partnership⁴

Following the completion of the TVA Natural Resource Plan (TVA 2011), TVA developed new RLMP layouts to improve consistency, and the Draft 2025 RLMP incorporates the updated RLMP layout. Consistent with this updated design, this document provides background information about TVA’s land management throughout its history and specifically focuses on TVA’s management of reservoir lands surrounding Tims Ford Reservoir. It explains the purpose of this draft 2025 RLMP and describes the process used in its development. Parcel descriptions for all TVA managed parcels are included in Chapter 4 of this document along with maps that delineate the draft land use allocations on Tims Ford Reservoir (see Appendix A).

1.1 Tennessee Valley Authority History

President Franklin Roosevelt recognized the need for creative solutions to lift the nation out of the depths of the Great Depression, and the TVA is considered one of his most innovative initiatives. Roosevelt envisioned TVA as an agency different from any other. He asked Congress to create “a corporation clothed with the power of government but possessed of the flexibility and initiative of a private enterprise.” On May 18, 1933, Congress passed the Tennessee Valley Authority Act (TVA Act). A link to the TVA Act is available at <https://www.tva.com/About-TVA/Our-History>.

From the start, TVA established a unique problem-solving approach to fulfilling its mission: Integrated Resource Management. Each issue TVA faced, whether it was power production, navigation, flood control, malaria prevention, reforestation, or erosion control, was studied in its broadest context. TVA weighed each issue relative to the others. From this beginning, TVA has held fast to its strategy of integrated solutions, even as the issues changed over the years. A short TVA history is available at <https://www.tva.gov/About-TVA/Our-History>.

1.2 Overview of TVA’s Mission and Environmental Policy

1.2.1 TVA’s Mission

TVA has a rich history of improving quality of life and economic prosperity for people and

⁴ This zone is unique to Tims Ford and is only applicable historically and to Alternatives A and C.

communities in the TVA service area. TVA was created by Congress in 1933 and charged with a unique mission—to improve the quality of life in the Valley through the integrated management of the region’s resources. For more than nine decades, TVA has worked tirelessly to carry out that mission and to make life better for the ten million people who live in the Valley today. TVA serves the people of the Valley by focusing on three key areas: energy, environment, and economic development.

While TVA’s mission has not changed, the environment in which TVA does business continues to evolve. Facing challenging economic conditions, tougher new environmental standards, the need to modernize its generating fleet and changing customer needs, TVA recognized a need to refine its strategic vision for the future.

1.2.2 Environmental Policy

The TVA Board approved an updated Environmental Policy on May 7, 2020. The Environmental Policy states, “TVA improves quality of life and the environment in the Tennessee Valley by providing reliable, affordable and increasingly clean energy; engaging in proactive stewardship of the Tennessee River system and public lands; and supporting sustainable economic growth.” TVA continues to integrate sustainable practices into business operations by establishing goals, measuring progress and reporting performance in six key areas:

- Climate Change Mitigation
- Air Quality Improvement
- Water Resource Monitoring
- Waste Minimization
- Environmental Reviews
- Sustainable Land Use and Natural Resource Management

TVA is committed to implementing the Environmental Policy through environmental protection and compliance, continuous improvement, and partnership and transparency. TVA’s overarching Environmental Policy objective is to provide further guidance in how TVA carries

out its mission in energy, economic development, and environmental stewardship. A copy of the Environmental Policy is available at www.tva.com/environmentalpolicy.

1.2.3 Land Policy

On behalf of the United States (U.S.), TVA originally acquired approximately 1.3 million acres of land in the Valley. Creation of the TVA reservoir system inundated approximately 470,000 acres with water. TVA has transferred or sold approximately 509,000 acres, the majority of which was transferred to other federal and state agencies for public uses. TVA currently manages approximately 293,000 acres of reservoir lands, which continue to be managed pursuant to the TVA Act (Figure 1-1). As part of its management of these lands, TVA allocates them to various land use zones (see Section 3.1). These TVA-managed lands are frequently referred to as “TVA lands” in this document.

In 2006, TVA adopted a Land Policy to guide retention, disposal, and planning of real property. It is TVA's policy to manage its lands to protect the integrated operation of the TVA reservoir and power systems, to provide for appropriate public use and enjoyment of the reservoir system, and to provide for continuing economic growth in the Valley. The Land Policy is available at www.tva.com/landpolicy.

1.2.4 Shoreline Management Policy

In November 1998, TVA completed a Shoreline Management Initiative (SMI) EIS (TVA 1998) analyzing possible alternatives for managing residential shoreline development throughout the Valley. TVA adopted the current Shoreline Management Policy (SMP) in November 1999. The SMP incorporates a strategy of managing public shoreline through an integrated approach that conserves, protects, and enhances shoreline resources and public use opportunities while providing for the reasonable and compatible use of the shoreline by adjacent residents and defines the standards for vegetation management, docks, shoreline stabilization, and other residential shoreline alterations. On August 20, 2009, the TVA Board of Directors decided to amend the SMP to terminate the “Maintain and Gain” program, which allowed for the exchange of shoreline access rights of equal or greater value. SMP information is available at www.tva.com/smp.

Figure 1-1. Map of TVA-Managed Reservoir Land

1.2.5 Section 26a of the TVA Act

The TVA Act of 1933 confers on TVA the broad authority related to the unified conservation and development of the Valley and surrounding area and directs that property in TVA's custody be used to promote the Act's purposes. In particular, Section 26a requires that TVA's approval be obtained prior to the construction, operation, or maintenance of any dam, appurtenant works, or other obstruction affecting navigation, flood control, or public lands or reservations across, along, or in the Tennessee River or any of its tributaries. TVA's Section 26a regulations include shoreline construction standards as well as other requirements regarding TVA's Section 26a jurisdiction. Section 26a regulations are available at www.tva.com/26aregulations.

1.3 The Natural Resource Plan

In 2011, TVA adopted a Natural Resource Plan (NRP) (TVA 2011) that strategically guides the management of both renewable and nonrenewable resources, underscoring the importance of protecting those resources that will be lost forever if they are not actively protected or improved today. The TVA Board approved an updated NRP in 2020 (TVA 2020) that supports a more strategic, flexible and comprehensive management approach to TVA's natural and cultural resource stewardship work. As such, the NRP is designed to:

- Integrate the objectives of ten focus areas (Reservoir Lands Planning, Section 26a Permitting and Land Use Agreements, Public Land Protection, Land and Habitat Stewardship, Nuisance and Invasive Species Management, Cultural Resource Management, Water Resources Stewardship, Recreation, Ecotourism, and Public Outreach and Information)
- Provide optimum public use benefit
- Balance competing and sometimes conflicting resource uses
- Coordinate and collaborate with partners and stakeholders to meet near- and long-term resource needs

These competing demands on the Valley's natural resources, coupled with today's environmental awareness and focus on preserving nonrenewable resources, underscore the necessity for a consistent approach to the management of federal lands and waters in the care of TVA. The NRP represents TVA's high-level strategy for managing its natural resources in the

near and long term. The NRP is available at www.tva.com/nrp.

1.3.1 Comprehensive Valleywide Land Plan

As part of the NRP, TVA adopted the Comprehensive Valleywide Land Plan (CVLP), which established target allocation ranges for each type of land use to enable TVA to maintain a desired balance of shoreline land uses on a system-wide basis. The CVLP and its allocation range targets enable TVA and the public to consider allocations across the reservoir system and determine whether too much or too little attention is being given to particular land uses. The objectives of the CVLP are designed to implement TVA's mission of serving the Valley through energy, environment, and economic development. Under the CVLP methodology, TVA will develop and update Reservoir Land Management Plans (RLMPs), such as this plan, for a portion of a reservoir, an entire reservoir, or a group of reservoirs. RLMPs are consistent with TVA's policies and programs discussed within this chapter.

Since the 2011 adoption of the CVLP, the TVA Board has approved one update in 2017 to the allocation range targets. The current Valleywide percentages of TVA reservoir land use allocations shown in Table 1-1 represent the land use allocation acreages in approved RLMPs.

Table 1-1. Current and Comprehensive Valleywide Land Plan Allocation Ranges

Allocation Designation ¹		Current Valleywide Allocation (Percent)	CVLP Allocation Ranges (Percent)
Zone 2	Project Operations	8.7	7 to 10
Zone 3	Sensitive Resource Management	16.1	14 to 18
Zone 4	Natural Resource Conservation	60.0	56 to 63
Zone 5	Industrial	1.6	1 to 3
Zone 6	Developed Recreation	8.5	8 to 10
Zone 7	Shoreline Access	5.2	5 to 6

¹ Zone 1 – Non-TVA Shoreland represents private land on which TVA retained certain rights such as flowage.

1.4 Purpose of Reservoir Land Planning

As a regional development agency and the nation's largest public power provider, TVA is committed to protecting and sustaining the environmental resources of the Valley for future generations through leadership in clean energy innovation and environmental management. In managing its public lands and resources, TVA seeks to provide efficient resource stewardship that is responsive to stakeholder interests.

An increasing demand for use of reservoir lands sometimes results in conflicting public opinions

regarding the most appropriate use of individual parcels of TVA public land. These competing interests and development pressures, coupled with today's environmental awareness, underscore the necessity for a methodical and comprehensive planning approach to the management, retention, and disposal of reservoir lands managed by TVA.

The purpose of reservoir lands planning is to apply a systematic method of identifying and evaluating the most suitable uses of TVA public lands in furtherance of TVA's responsibilities under the TVA Act and TVA policies and plans. Updates to RLMPs are needed to reflect changing land use needs and/or circumstances and to incorporate TVA's business needs and goals for managing its public lands.

CHAPTER 2. REGIONAL OVERVIEW

The headwaters of the Tennessee River are in eastern Tennessee, in southwestern Virginia, western North Carolina and in northern Georgia. The Tennessee River is formed by the confluence of the Holston and French Broad rivers, just above Knoxville, Tennessee. The river flows in a southwesterly direction through Tennessee, crosses northern Alabama, forms a small portion of the northeastern boundary of Mississippi, and then flows north through western Tennessee and western Kentucky to empty into the Ohio River at Paducah, Kentucky, a distance of about 650 miles. The Tennessee River drains an area of 40,910 square miles - about equal to the area of Ohio. The headwaters are in the Smoky Mountains and the Blue Ridge Mountains, which are the highest ranges east of the Rockies. The mountain region is in striking contrast to the relatively flat lands of northern Alabama and to the rolling land of western Kentucky.

The TVA Act was amended August 31, 1935, requiring TVA to report to Congress their recommendations for the unified development of the Tennessee River System. The system would include nine main rivers, multi-purpose dams, and three or more tributary storage dams. The system would contribute substantially to the control of floods on the Tennessee, lower Ohio, and lower Mississippi Rivers, establish a formalized navigation channel and provide many related benefits, including a large supply of electric power. By the end of 1970, the integrated water control system in the Valley was comprised of 32 major dams, nine on the Tennessee River and 23 on its tributaries.

2.1 History of Tims Ford Dam

Tims Ford Reservoir is an impoundment of the Elk River formed by Tims Ford Dam which is located at Elk River mile 133.3. Tims Ford Reservoir is situated in Franklin and Moore Counties in middle Tennessee. Tims Ford Reservoir provides a resource for power generation, recreation, water supply, and flood damage reduction downstream on the Elk River.

In 1963, the Tennessee State Legislature created the Tennessee Elk River Development Agency (TERDA) to develop and effectuate, "plans and programs for comprehensive development including the control and development of the water resources," with the legal authority necessary to carry out phases of resource development being planned for the Elk River Watershed. TVA and TERDA worked cooperatively through a Memorandum of

Understanding to get the Tims Ford Project approved and constructed. The Tims Ford Project was approved by the U. S. Congress in 1965. Construction of the Tims Ford Dam began in 1966 and was completed in 1970.

The Tims Ford Project involved more than construction of the dam. It involved the assembly and acquisition of approximately 21,863 acres of land in Franklin and Moore Counties. To make way for the reservoir, other project activities included surveying, mapping, and clearing the reservoir area; relocating buildings, roads, cemeteries, utilities; and relocating families.

The Tims Ford Project (not including Tims Ford Dam) was operated and managed by TERDA in cooperation with TVA until April 1996. At that time, the General Assembly of the State of Tennessee passed Public Chapter No. 816 terminating and ceasing all activities of TERDA and transferring all of TERDA's powers, duties, contractual obligations, and functions to the Tennessee Department of Environment and Conservation (TDEC). The General Assembly urged TDEC to dispose of all remaining properties belonging to TERDA as expeditiously as practicable and lawful. TVA and TDEC then entered into a new agreement that redefined roles and responsibilities of both agencies and stipulated the cooperative development of a Plan to dispose of the remaining land interests. This ultimately resulted in the 2000 RLMP and a 2010 transfer of lands between TVA and the State of Tennessee. The transfer of lands allowed for better land management practices to align with the responsibilities TDEC and TVA. It also allowed for the creation of Owl Hollow Wildlife Management Area to be managed by the Tennessee Wildlife Resource Agency (TWRA). The 2000 RLMP planned both TVA lands and State of Tennessee lands.

2.2 Tims Ford Reservoir and Present Shoreline

The drainage area of the Elk River upstream of Tims Ford Dam consists of 529 square miles. Tims Ford Reservoir has a flood-storage capacity of 219,600 acre-feet and a total surface area of 10,500 acres. The summer operating range of the reservoir is typically between elevations 885 feet mean sea level (msl) and 888 feet msl. The reservoir property is situated in Franklin and Moore counties in Tennessee (Figure 2-1). The reservoir is easily accessible to residents of Winchester, Decherd, Estill Springs, Tullahoma, Manchester, and Lynchburg.

In the Draft 2025 RLMP, only TVA lands will be reviewed since the transfer of lands with the State of Tennessee has been completed. Therefore, in the revised TVA acreage, there are approximately 4,685.5 acres of Tims Ford Reservoir shoreland on which TVA can plan future

Figure 2-1. Map of TVA-Managed Lands on Tims Ford Reservoir

uses. This public land includes about 309 miles of shoreline where TVA retains the fee interest in land below the 895-foot contour on the entirety of the Tims Ford Reservoir shoreland.

Any structures placed on TVA land, within TVA flowage easements, or within the 500-year floodplain are subject to Section 26a of the TVA Act. Section 26a of the TVA Act requires that TVA's approval be obtained prior to the construction, operation or maintenance of any dam, appurtenant works, or other obstruction affecting navigation, flood control, or public lands or reservations across, along, or in the Tennessee River or any of its tributaries. Section 26a permits would continue to be issued in accordance with TVA's regulations and guidelines. Additionally, through the implementation of the NRP, TVA would continue to manage shoreline permissions and public land consistent with existing Board policies such as the SMP and the Land Policy. TVA would also seek to educate, communicate, and provide consistent guidance on the use and development of eligible public lands and shorelines.

2.2.1 Natural Resource Management

Through implementation of the NRP, TVA will continue to support protection and enhancement of the biological resources of the Valley in a sustainable manner to support diverse habitats for wildlife populations. The Land and Habitat Stewardship focus area guides TVA's management of the forest lands, grasslands, wetlands, and wildlife and their habitats through the continued evaluation of biological resources. This allows TVA to prioritize and then preserve sensitive resources (e.g., listed species and wetlands) and unique resources (e.g., old growth bottomland forests), as well as manage renewable resources (e.g., forests and native warm season grasses) in a sustainable manner to support diverse habitats for wildlife populations.

TVA public lands also provide many benefits to the people of the Valley and the Public Land Protection focus area serves to help prevent abuse and destruction of this land and to take necessary steps to remedy unauthorized uses and encroachments, as well as to engage and educate the public (NRP 2020).

TVA also seeks to protect public lands through stabilization efforts. In some cases, TVA is seeking to protect and stabilize shorelines with sensitive resources in need of protection. In other cases, TVA may partner with backlying landowners or other agencies to stabilize shorelines with severe erosion issues to prevent land loss and improve water quality. This is generally done through a temporary cooperative agreement that benefits both parties. Where possible, vegetative plantings are encouraged in conjunction with streambank stabilization.

2.2.2 Developed Recreation Areas

TVA provides public lands for developed and dispersed recreational purposes through the lands planning process. Developed recreation includes campgrounds, marinas, boat-launching ramps, parks, and beaches. Dispersed recreation activities include picnicking, primitive camping, hiking, bank fishing, hunting, kayaking, and canoeing. In 2005, TVA developed a recreation strategic plan aimed at collaboratively enhancing recreational opportunities and addressing unmet recreational needs while managing the resources of the Tennessee River system (TVA 2005). This strategy laid out guiding principles for how to best design and develop recreation opportunities. During this reservoir lands planning effort, tracts of TVA-managed lands were categorized based upon a suitable use that is consistent with TVA policy and guidelines and applicable laws and regulations.

Through implementation of the NRP and the Recreation focus area, TVA will continue to focus on promoting environmentally sustainable recreational use on TVA reservoirs and the land surrounding them. With the Ecotourism focus area, TVA continues its mission of resource stewardship and economic development by building partnerships that support local, state, and regional tourism, especially nature-based, outdoor adventure and sustainable activities.

Table 2-1 itemizes developed recreation lands available around Tims Ford Reservoir. A large number of these areas are managed by TDEC.

2.3 The Future Management of Reservoir Lands

Varying types of land management or conservation techniques coupled with development could occur along Tims Ford Reservoir. The implementation of the NRP will drive the types of programs conducted on TVA lands. Business opportunity, overall economy, local incentives, and community planning practices are factors that could contribute to the types of industry locating or expanding along the reservoir. Recreation demand is driven by population levels, recreation participation rates, changing preferences for different types of recreation, and innovations in recreation equipment. Residential development is often opportunistic; however, the lands set aside for such use are based on existing property rights and areas where permits have been historically issued or allowed for residential use.

CHAPTER 3. LAND PLANNING PROCESS

3.1 Process for Planning Land

The reservoir land management planning process involves allocation of TVA fee-owned land to defined land use zones. The term “land use zone” refers to a descriptive set of criteria given to distinct areas of land based on location, features, and characteristics. The land use zone definitions listed in Table 3-1 are identical to those listed in the NRP. The definition of a land use zone provides a clear statement of how TVA will manage public land, and allocation of a parcel to a particular land use zone identifies that land for specific uses. Implementation of an RLMP minimizes conflicting land uses and makes it easier to handle requests for use of public land.

Table 3-1. Land Use Zone Definitions

Zone	Definition
Zone 1 Non-TVA Shoreland	<p>Shoreland that TVA does not own in fee. This land may be privately owned or owned by a governmental entity other than TVA. Uses of this non-TVA land may include residential, industrial, commercial, and/or agricultural. In many instances, TVA may have purchased the right to flood and/or limit structures on this non-TVA land (i.e., flowage easement). TVA’s permitting authority under Section 26a of the TVA Act applies to construction of structures on non-TVA shoreland.</p> <p>Non-TVA shoreland allocations are based on deeded rights and, therefore, will not change as a result of the lands planning process. This category is provided to assist in comprehensive evaluation of potential environmental impacts of TVA’s allocation decision.</p>

Zone	Definition
<p>Zone 2 Project Operations</p>	<p>Land currently used, or planned for future use, for TVA operations and public works projects, including:</p> <ul style="list-style-type: none"> • Land adjacent to established navigation operations — Locks, lock operations and maintenance facilities, and the navigation work boat dock and bases. • Land used for TVA power projects operations — Generation facilities, switchyards, and transmission facilities and rights-of-way. • Dam reservation land — Areas acquired and managed for the primary purpose of supporting the operation and maintenance of TVA dams and associated infrastructure; secondary uses may also include developed and dispersed recreation, maintenance facilities, miscellaneous TVA field offices, research areas, and visitor centers. • Navigation safety harbors/landings — Areas used for tying off commercial barge tows and recreational boats during adverse weather conditions or equipment malfunctions. • Navigation dayboards and beacons — Areas with structures placed on the shoreline to facilitate navigation. • Public works projects — Includes rights-of-way for public utility infrastructure, such as sewer lines, water lines, transmission lines, and major highway projects.
<p>Zone 3 Sensitive Resource Management</p>	<p>Land managed for protection and enhancement of sensitive resources. Sensitive resources, as defined by TVA, include resources protected by state or federal law or executive order and other land features/natural resources TVA considers important to the area viewscape or natural environment.</p> <p>Recreational natural resource activities, such as hunting, wildlife observation, and camping on undeveloped sites, may occur in this zone, but the overriding focus is protecting and enhancing the sensitive resource the site supports. Areas included are:</p> <ul style="list-style-type: none"> • TVA designated sites with potentially significant archaeological resources • TVA public land with sites/structures listed in or eligible for listing in the National Register of Historic Places • Wetlands — Aquatic bed, emergent, forested, and scrub-shrub wetlands as defined by TVA. • TVA public land under easement, lease, or license to other agencies/individuals for resource protection purposes. • TVA public land fronting land owned by other agencies/individuals for resource protection purposes. • Habitat protection areas — These TVA natural areas are managed to protect populations of species identified as threatened or endangered by the U.S. Fish and Wildlife Service, state-listed species, and any unusual or exemplary biological communities/geological features. • Ecological study areas — These TVA natural areas are designated as suitable for ecological research and environmental education by a recognized authority or agency. They typically contain plant or animal populations of scientific interest or are of interest to an educational institution that would utilize the area. • Small wild areas — These TVA natural areas are managed by TVA or in cooperation with other public agencies or private conservation organizations to protect exceptional natural, scenic, or aesthetic qualities that can also support dispersed, low-impact types of outdoor recreation.

Zone	Definition
	<ul style="list-style-type: none"> • River corridor with sensitive resources present — A river corridor is a segment of a river and the adjacent land along the banks. River corridors often consist of a linear green space of TVA land serving as a buffer to tributary rivers entering a reservoir. These areas will be included in Zone 3 when identified sensitive resources are present. • Significant scenic areas — Areas designated for visual protection because of their unique vistas or particularly scenic qualities. • Champion tree site — Areas designated by TVA as sites that contain the largest known individual tree of its species in that state. The state forestry agency “Champion Tree Program” designates the tree, while TVA designates the area of the sites for those located on TVA public land. • Other sensitive ecological areas — Examples of these areas include heron rookeries, uncommon plant and animal communities, and unique cave or karst formations.
<p>Zone 4 Natural Resource Conservation</p>	<p>Land managed for the enhancement of natural resources for human use and appreciation. Management of resources is the primary focus of this zone. Appropriate activities in this zone include hunting, timber management to promote forest health, wildlife observation, and camping on undeveloped sites. Areas included are:</p> <ul style="list-style-type: none"> • TVA public land managed for wildlife or forest management projects. • TVA public land under easement, lease, or license to other agencies for wildlife or forest management purposes. • TVA public land fronting land owned by other agencies for wildlife or forest management purposes. • Dispersed recreation areas maintained for passive, dispersed recreation activities, such as hunting, hiking, bird watching, photography, primitive camping, bank fishing, and picnicking. • Shoreline conservation areas — Narrow riparian strips of vegetation between the water’s edge and TVA’s backlying property that are managed for wildlife, water quality, or visual qualities. • Wildlife observation areas — TVA natural areas with unique concentrations of easily observed wildlife that are managed as public wildlife observation areas. • River corridor without sensitive resources present — A river corridor is a linear green space along both stream banks of selected tributaries entering a reservoir managed for light boat access at specific sites, riverside trails, and interpretive activities. River corridors will be included in Zone 4 unless sensitive resources are present (see Zone 3). • Islands without sensitive resources or existing development.
<p>Zone 5 Industrial</p>	<p>Land currently used, or planned for future use, for economic development, including businesses in distribution/processing/assembly and manufacturing. Preference will be given for businesses requiring water access. There are two primary types of uses for TVA land allocated for Industrial: (1) access for water supply or structures associated with navigation such as barge terminals, mooring cells, etc., or (2) land-based development potential.</p> <p>Areas included are:</p> <ul style="list-style-type: none"> • TVA public land under easement, lease, or license to other agencies/individuals/entities for industrial purposes. • TVA public land fronting land owned by other agencies/individuals/entities for industrial purposes. <p>Types of development that can occur on this land are:</p>

Zone	Definition
	<ul style="list-style-type: none"> • Industry — Manufacturing, fabrication, and distribution/processing/assembly involving chemical, electronics, metalworking, plastics, telecommunications, transportation, and other industries. Industry does not include retail or service-based businesses. • Industrial access — Access to the waterfront by backlying property owners across TVA property for water intakes, wastewater discharge, or conveyance of commodities (i.e., pipelines, rail, or road). Barge terminals are associated with industrial access corridors. • Barge terminal sites — Public or private facilities used for the transfer, loading, and unloading of commodities between barges and trucks, trains, storage areas, or industrial plants. • Fleeting areas — Sites used by the towing industry to switch barges between tows or barge terminals that have both offshore and onshore facilities. • Minor commercial landing — A temporary or intermittent activity that takes place without permanent improvements to the property. These sites can be used for transferring pulpwood, sand, gravel, and other natural resource commodities between barges and trucks.
<p>Zone 6 Developed Recreation</p>	<p>Land currently used, or planned for future use, for concentrated, active recreational activities that require capital improvement and maintenance of developed infrastructure, including:</p> <ul style="list-style-type: none"> • TVA public land developed for recreational purposes such as campgrounds, day use areas, etc. • TVA public land under easement, lease or license to other agencies/individuals/entities for developed recreation purpose. • TVA public land fronting land owned by other agencies/individuals/entities for developed recreational purposes. <p>Residential use, long-term accommodations, and/or individually owned units are not permitted on land allocated for developed recreation. Types of development that can occur on this land are:</p> <ul style="list-style-type: none"> • Public recreation — Recreation amenities on publicly owned land with facilities developed by a public agency (or their concessionaire) and provides amenities that are open to the public. Public recreation areas may have varying levels of development, ranging from a water access site (e.g., launching ramp) to a marina facility. Facilities at public recreation areas could include playgrounds/play structures, picnic facilities, tennis courts, horseshoe areas, play courts, recreation centers, trails, greenways, natural areas, amphitheaters, food concessions (vending, snack bar), access to water for fishing and boating, swimming areas, and swimming pools, launching ramps, courtesy piers, canoe access, marina facilities owned by the public entity, parking and campgrounds. Cabins or other overnight accommodations (other than campgrounds) are only permitted if the public recreation area is operated by a state or state agency as a component of a state park system. • Commercial recreation — Recreation amenities that are provided for a fee to the public intending to produce a profit for the private owner/operator. These primarily water-based facilities typically include marinas and affiliated support facilities such as stores, restaurants, campgrounds, and cabins and lodges. Where applicable, TVA will require appropriate compensation for the commercial use of the property.

Zone	Definition
<p>Zone 7 Shoreline Access</p>	<p>TVA-owned land where Section 26a applications and other land use approvals for residential shoreline alterations are considered in accordance with TVA's Shoreline Management Policy. Types of development/management that may be permitted on this land are:</p> <ul style="list-style-type: none"> • Residential water-use facilities, such as docks, piers, boathouses, launching ramps, marine railways, , and nonpotable water intakes. • Shoreline access corridors, such as pathways, steps, walkways, or mulched paths that can utility lines. • Shoreline stabilization, such as bioengineering, riprap, gabions, and retaining walls. • Shoreline vegetation management.
<p>Zone 8 ⁵ Conservation Partnership</p>	<p>Narrow strips of public shoreland that could be used to help establish a wider shoreline buffer zone to benefit the environment. This would be accomplished through establishment of conservation partnerships with adjacent private property owners resulting in conservation partnership easements. Increasing the shoreline buffer area would benefit water quality, shoreline habitat, and shoreline aesthetics while reducing shoreline erosion.</p> <p>To ensure long-term maintenance and enhancement of the riparian zone, a 100-foot-deep conservation partnership easement (from the 895-foot contour) consisting of TVA and privately owned land would be conveyed to TVA from the Shoreline Protection Partners in exchange for TVA consideration of requests for limited community water-use facilities on public land. The easement would run with the land making the subsequent sale of the private property containing the shoreline buffer subject to TVA's easement interest in the land as long as a Section 26a permit for a water-use facility exists. The shoreline protection easement will be recorded at the county courthouse.</p> <p>This area would have harbor limits established consistent with SMP and could contain, depending on site restrictions, facilities associated with a community dock. A maximum of 2000 square-foot (footprint) of facility (dock) area would be allowed. The facility would be located in such a manner as to avoid any sensitive areas if identified during the Section 26a review process. Examples of community facilities/activities that could be considered in Zone 8 are:</p> <ul style="list-style-type: none"> • Courtesy pier • Boatslip • Dock • Shoreline stabilization where needed to reduce erosion (such as bioengineering and riprap)

This draft RLMP was developed by a team of land managers and technical experts from TVA, knowledgeable about the reservoir and its resources. The planning team made land use decisions by integrating public needs, environmental conditions, economic benefits, state and federal policies, and the original congressional intent of the Tims Ford Reservoir project. The process includes information from resource data, computer analysis, the public, other agencies,

⁵ This definition is from the 2000 RLMP and would only be utilized as-is in Option A, but may be referenced for historical purposes.

and knowledgeable TVA staff. This draft RLMP is consistent with the strategic direction of the NRP and meets the objectives of the CVLP. Furthermore, the categorization and management of TVA-owned shoreline access land along Tims Ford Reservoir tiers from the *Shoreline Management Initiative Environmental Impact Statement* (SMI EIS).

TVA intends to manage its public land for an optimum level of multiple uses and benefits that protect and enhance natural, cultural, recreational, and visual resources in a cost-effective manner. Through this approach, TVA ensures that resource stewardship issues and stakeholder interests are considered while optimizing benefits and minimizing conflicts.

Prior to allocating parcels, the TVA planning team reviewed the characteristics of each parcel (i.e., location and existing conditions). TVA also reviewed deeds of tracts previously sold to private entities to identify existing shoreline access rights. In addition, the planning team honored all existing commitments including, existing leases, licenses, and easements. TVA also reviewed the historical files, particularly those related to TERDA and past permitting practices. No sensitive resources surveys were conducted on committed land. The need for field reviews for uncommitted parcels was determined based on data from the TVA Natural Heritage database. Land with identified sensitive resources was placed in the Sensitive Resource Management Zone. The remaining parcels were allocated based on reservoir planning objectives and public input. Decisions were made by consensus among the TVA planning team. During the allocation process, the planning team allocated the reservoir land to one of seven planning zones using the zone definitions listed above.

Land currently committed to a specific use was allocated to a zone compatible with that use unless there was an overriding need to change the use. Some committed land uses are determined by the covenants and provisions of easements, leases, licenses, and sale and transfer agreements. Committed lands include the following: properties where TVA has granted landrights (easements, leases, etc.) for specific uses, properties where TVA has previously identified resources in need of protection, Project Operations lands (transmission lines, dam reservations, public infrastructure, etc.), and lands fronting wildlife management areas. Possible reasons to change a committed land use would be to prevent or remedy ongoing adverse impacts resulting from the actions of a license or easement holder. The location of agreements, rights-of-way, and other commitments are mapped based on best available information, but the information is an approximation and should not be used in lieu of survey documentation.

Approximately 896 acres (19 percent) of the TVA land surrounding Tims Ford Reservoir are committed due to existing agreements, TVA operations and other public infrastructure projects. Agricultural licenses and cooperative agreements are not considered as committed uses because they are an interim use of TVA land. There are some lands on Tims Ford that are not considered committed but have historical use previous to TVA due to TERDA lands management practices prior to 1996. This was taken into consideration during the lands planning process.

Approximately 3,790 acres (81 percent) of the TVA land surrounding Tims Ford Reservoir is uncommitted. Representatives from various TVA organizations met to allocate these uncommitted lands into the seven planning zones. The location of known and potentially sensitive resources was used in determining the capability and suitability of potential uses for each parcel of land.

3.2 Tims Ford Reservoir Land Planning Goals and Objectives

The NRP established long-term reservoir lands planning goals and objectives. While these goals and objectives were established to guide planning decisions across the Valley, these same goals and objectives can be applied when planning specific reservoirs.

Goal

TVA will strive to continue to balance shoreline development, recreational use, sensitive and natural resource management, industrial use and other land uses in a way that maintains the quality of life and other important values across the region.

Objectives

Apply a systematic method of evaluating and identifying the most suitable uses of TVA public lands using resource data, stakeholder input, suitability and capability analyses, and TVA staff input.

- Identify land use zone allocations to optimize public benefit and balance competing demands for the use of public lands.
- Identify land use zone allocations to support TVA's broad regional resource development mission. TVA reservoir properties are managed to provide multiple public benefits, including recreation, conservation, and economic development.

- Provide a clear process by which TVA will respond to requests for use of TVA public land.
- Comply with federal regulations and executive orders.
- Enhance the protection of significant resources, including threatened and endangered species, cultural resources, wetlands, unique habitats, natural areas, water quality, and the visual character of the reservoir.

3.3 Parcel Allocations

TVA's reservoir lands planning process (Section 3.1) along with TVA's goals and objectives for planning reservoir lands (Section 3.2) were used to develop this draft RLMP. Through this process, TVA is proposing allocations for each reservoir parcel to one of the seven planning zones as indicated in Table 3-2.

Table 3-2. Summary of Land Use Allocations for Draft Tims Ford RLMP

Allocation Designation ¹	Alternative A (No Action)		Alternative B (Preferred Alt.)		Alternative C		Alternative D	
	Number of Parcels	Acres	Number of Parcels	Acres	Number of Parcels	Acres	Number of Parcels	Acres
Zone 2 - Project Operations	1	390.5	20	477.6	20	477.6	20	477.6
Zone 3 - Sensitive Resource Management	8	642.6	5	366.3	5	366.3	5	357.0
Zone 4 - Natural Resource Conservation	40	2,462.8	36	2,681.2	57	2,715.6	36	2,681.2
Zone 5 - Industrial	3	8.7	1	0.2	1	0.2	1	0.2
Zone 6 - Developed Recreation	17	632.1	18	641.7	18	641.7	18	651.0
Zone 7 - Shoreline Access	39	460.9	80	518.5	33	459.0	80	518.5
Zone 8 – Conservation Partnership	50	66.3	0	---	26	25.0	0	---

¹ Zone 1 and 2000 RLMP unplanned lands not shown

Figure 3-1 represents the percent of TVA-managed lands on Tims Ford Reservoir allocated to each land use zone. The location of TVA allocated land on Tims Ford Reservoir is shown in Appendix A. A detailed description of each zone and the identification of the land zoned by each category is presented below:

- **Zone 2 (Project Operations).** Zone 2 encompasses all TVA land currently used for TVA operations and public works projects such as roadways, water lines, and transmission lines. Under all options (except Option A) for the Draft 2025 RLMP, 10.2 percent (477.6 acres) of TVA owned land on Tims Ford Reservoir would be allocated to Zone 2. The largest parcel allocated as Zone 2 is Tims Ford Dam Reservation which also contains transmission lines, substations, access roads, and public recreational facilities such as ramps, piers, and picnic areas. Under the 2000 RLMP, most of the public works projects were not allocated for Zone 2, therefore, this allocation has seen the largest increase by percent.
- **Zone 3 (Sensitive Resource Management).** Zone 3 lands are managed for protection and enhancement of sensitive resources. Sensitive resources, as defined by TVA, include resources protected by state or federal law or executive order and other land features and/or natural resources TVA considers important to the natural environment. Under all options (except Option A) of the Draft 2025 RLMP, approximately 7.8 percent (366.3 acres) under Options B and C or 7.6 percent (357.0 acres) under Option D would be allocated for Zone 3 (Sensitive Resource Management) which is less than under the 2000 RLMP (13.7% or 642.6 acres). The reason for this decrease is that sensitive resources were not identified in the review of the parcels previously identified with sensitive resources. Under Option D, there is slightly more Zone 3 acreage proposed for reallocation due to an expansion of an area proposed for Zone 6 (Developed Recreation) where it would otherwise be proposed for Zone 3 (Sensitive Resource Management). However, the majority of this Zone 3 acreage proposed for reallocation would be converted to Zone 4 (Natural Resource Conservation) acreage and would still be managed by TVA for the enhancement of natural resources.
- **Zone 4 (Natural Resource Conservation).** Lands allocated to Zone 4 are managed for the enhancement of natural resources for human use and appreciation. Management of resources is the primary focus of this zone. Appropriate activities on parcels allocated to Zone 4 include hiking, wildlife observation, bank fishing, hunting, timber management to promote forest health, and camping on undeveloped sites. Under all options (except Option A) of the Draft 2025 RLMP, the largest percentage of the TVA land would be allocated to Zone 4. Under Options B and D, the amount allocated is 57.2 percent (2,681.2 acres) and under Option C the amount allocated is 58.0 percent (2,715.6 acres). The reason why the allocation acreage is slightly higher under Option C is

Figure 3-1. Percent of Tims Ford Reservoir Acreage Allocated by Zone (Option B)

because additional Zone 8 parcels would be reallocated to Zone 4 than under Options B and D. In addition to the large amount allocated to Zone 4, TWRA also manages a large amount of land adjacent to TVA as part of the Owl Hollow Mill WMA adjacent to Parcel 48.

- **Zone 5 (Industrial).** Lands allocated as Zone 5 are managed for economic development including businesses in distribution/processing/assembly and light manufacturing. Under all options (except Option A) the Draft 2025 RLMP, only one small parcel, approximately 0.2 acres (less than 1 percent of TVA land) would be allocated to Zone 5 to reflect existing industrial uses. The reason why only a small amount of acreage remains proposed for Zone 5 allocation is that in the 2000 RLMP, the lands adjoining Zone 5 properties belonged to TDEC and nearly all of those properties have since been sold and now are used for residential purposes. There are not many lands suitable for industrial use on Tims Ford since it is a tributary reservoir with no lock.
- **Zone 6 (Developed Recreation).** Land allocated as Zone 6 is currently used or planned for recreational purposes, such as boat-launching ramps, campgrounds, marinas, or parks. Under the draft RLMP for Options B and C, approximately 13.7 percent (641.7 acres) of TVA land on Tims Ford Reservoir would be allocated to Zone 6. These two options would include three existing recreation areas, not previously allocated for recreational use and one area currently used by the public for informal recreational use that TVA is proposing as a possibility for development by a public entity. Under Alternative D, 13.9 percent (651.0 acres) is proposed for allocation to Zone 6. The difference in this option is that one of the existing recreation areas is proposed for an expansion based on a previous inquiry. Under all options, the vast majority of the acreage represents tracts of land that are already in use or committed to use as recreational lands.
- **Zone 7 (Shoreline Access).** Lands allocated to Zone 7 are TVA-owned lands where Section 26a applications and other land use approvals for private water-use facilities are considered. Requests for private water-use facilities are considered on parcels identified in this zone where such use was previously considered, and/or where the backlying landowner possesses deeded rights of access, and where the proposed use would not conflict with the interests of the public. On Tims Ford Reservoir, the history of where TERDA permitted facilities is taken into account however, TVA must have

documentation of the TERDA permitting history in a subdivision (or specific residential area) and that facilities were built prior to when TERDA was sunset (1996). Under the draft RLMP, approximately 11.1 percent (518.5 acres) for Options B and D of TVA land around Tims Ford Reservoir would be allocated to Zone 7. Under Option C, 9.8 percent (459.7 acres) would be allocated to Zone 7.

- **Zone 8 (Conservation Partnership).** Lands allocated to Zone 8 are managed in partnership with backlying owners to create a larger vegetative buffer on private land in exchange for a community facility. The Zone 8 allocation is unique to Tims Ford Reservoir. Under Options B and D, there would no longer be a Zone 8 allocation. Rather those parcels would be reallocated to either a Zone 7 (with an orange line indicating additional restrictions) or a Zone 4, depending on the unique circumstances of the specific parcel. Under Option C, Zone 8 would have modified criteria, but would remain as part of the Tims Ford RLMP. Under Option C, approximately 0.5 percent (24.3 acres) of TVA land around Tims Ford Reservoir would be allocated to Zone 8.

Table 3-3 compares the percentage changes after the allocation under the draft RLMP with the current Valleywide allocation percentages for TVA's 293,000 acres of public land (based on the land use allocations in Board-approved RLMPs), and the updated 2017 CVLP target allocation ranges.

Table 3-3. CVLP Allocation Range Comparisons with Draft Tims Ford RLMP

Allocation Designation		Current Valleywide Allocation (Percent)	2017 CVLP Range (Percent)	Valleywide Allocation with Tims Ford Alternative B (Percent)	Valleywide Allocation with Tims Ford Alternative C (Percent)	Valleywide Allocation with Tims Ford Alternative D (Percent)
Zone 2	Project Operations	8.7	7 to 10	8.7	8.7	8.7
Zone 3	Sensitive Resource Management	16.1	14 to 18	16.0	16.0	16.0
Zone 4	Natural Resource Conservation	60.0	56 to 63	60.0	60.0	60.0
Zone 5	Industrial	1.6	1 to 3	1.6	1.6	1.6
Zone 6	Developed Recreation	8.5	8 to 10	8.6	8.6	8.6
Zone 7	Shoreline Access	5.2	5 to 6	5.2	5.2	5.2

The changes in this plan would result in minor fluctuations to the current valley-wide allocation

percentages but the allocations would remain within the 2017 Board-approved CVLP allocation ranges. In conclusion, the analysis conducted during the development of the draft RLMP supports the CVLP.

3.4 Property Administration

As stewards of public land, TVA uses the RLMPs, along with TVA policies and guidelines, to manage resources and to respond to requests for the use of TVA land. All inquiries about or requests for the use of TVA land should be made to the TVA Public Land Information Center at plpic@tva.gov or 800-882-5263 between 8 a.m. and 6 p.m. eastern time Monday through Friday.

Pursuant to the TVA Land Policy, TVA would consider changing a land use designation outside of the normal planning process only for the purpose of water access for industrial or commercial recreational operations on privately owned backlying land or to implement TVA's SMP.

Additionally, there are a small number of TVA parcels in the Valley that have deeded access rights for shoreline access that are currently utilized for other uses such as commercial recreation and industrial. Should the private backlying land become residential, a request for a change of allocation of the parcel to Shoreline Access (Zone 7) would be subject to, with the appropriate environmental review, action by the TVA Board, or its designee, or to Board-approved policy.

Consistent with the TVA Land Policy, those parcels or portions of parcels that have become fragmented from the reservoir may be declared surplus and sold at public auction. Public works/utility projects, such as easements for pipelines, power or communication wires, roads, or other public infrastructure, proposed on TVA land that would not affect the zoned land use or sensitive resources would not require an allocation change as long as such projects would be compatible with the use of the allocated zone. Proposed public works/utility projects would be subject to a project-specific environmental review. Any other requests involving a departure from the planned uses would require appropriate approval. Proposals consistent with TVA's policies and the allocated use, and otherwise acceptable to TVA, will be reviewed in accordance with NEPA and must conform to the requirements of other applicable environmental regulations and other legal authorities.

CHAPTER 4. PARCEL DESCRIPTIONS

Introduction

This chapter describes the uses determined to be the most suitable for each parcel of TVA land as shown on the land plan maps. The parcel descriptions include the land use zone allocations and relevant data regarding the planned uses. This includes data on existing land uses, physical characteristics of the land, presence of existing private water-use facilities, and any special considerations related to the future use. Land use zone definitions are included in Table 3-1 and are available at www.tva.com/landplanzones.

All uses of TVA public lands are subject to federal, state and local laws, rules and regulations. If there is a conflict between federal rules/laws and other laws, federal rules/laws prevail. Failure to comply may result in immediate removal from the property and other actions deemed appropriate by TVA and/or law enforcement officials.

In addition to allowable land uses and the requirements of TVA's policies and regulations described in Section 1.2, TVA has published rules for the use of public land. Specific rules for the use of developed and undeveloped TVA public lands are available at www.tva.com/publiclandrules. Examples of uses that are not allowable on any TVA public lands include leaving trash or litter, undertaking any land-disturbing activities such as construction of temporary or permanent structures, and vegetation cutting or removal without TVA approval. Furthermore, recreational use of motorized vehicles such as all-terrain vehicles (ATVs) is prohibited on undeveloped TVA public lands—including within reservoir drawdown areas.

TVA's Public Lands Information Center (800-882-5263 or plc@tva.gov) is a source for answers to any questions about TVA public land use.

Under Section 26a of the TVA Act, TVA reviews requests for construction of water-use facilities on TVA managed reservoirs in the Tennessee River Watershed. Section 26a provides that any obstructions along, across, or in the Tennessee River system (including water-use facilities) must be approved by TVA. All existing private water-use facilities with TVA permits are grandfathered, provided they are constructed in accordance with the plans approved. On Tims Ford Reservoir, TVA is proposing to issue 20-foot-wide access licenses in conjunction with grandfathered permits where both TERDA and/or TVA historically issued access licenses on allocations other than Zone 7. There would not be a charge for the license. The only fee would

be the applicable Section 26 application fees. If it is believed that a dock has been overlooked by TVA as grandfathered, documentation must be provided in the form of executed TERDA licenses, TVA licenses, Corps of Engineer Section 10/Section 401/404 permits, TVA Section 26a permits or a preferably a combination of the above. It is at TVA's discretion whether or not documentation is sufficient to consider a dock grandfathered. Section 26a regulations can be found at www.tva.com/26aregulations.

Please note that parcel descriptions denoted by an asterisk (*) indicate that the parcel is subject to additional restrictions. Some of these conditions were established in the 2000 RLMP and some will be determined in the Final Tims Ford RLMP. These parcels are identified in the planning maps with an orange line to raise awareness about the additional restrictions. This is not a separate zone designation. Please read the alternatives carefully to determine what restrictions may apply to these parcels.

Parcel descriptions are written with the assumption that Option B, TVA's preferred option is chosen. In the event that an alternative option is selected, the affected parcels will be updated accordingly.

Parcel 1 – (390.46 acres)

RLMP Allocation: Zone 2, Project Operations

This parcel is the Tims Ford Dam Reservation. The parcel is primarily used to support the operation and maintenance of Tims Ford Dam. Existing facility development includes the dam, the spillway, power lines, and associated access roads. The left descending bank has several recreational resources including a public boat ramp, two overlook areas (one upstream and one downstream of the dam), a small picnic area at the upstream overlook area, and a non-motorized stream access area downstream of the dam. These areas can be accessed from Lynchburg Road (Highway 50) and Tims Ford Dam Road. The right descending bank is currently undeveloped. The parcel is composed of mixed hardwoods and pine that have mostly been converted from old agricultural fields. Kitchens Cemetery and Weirs Cemetery are located on this parcel with access currently maintained by TVA. Tims Ford Dam is listed on the National Register of Historic Places. Current TVA information indicates that this parcel may have sensitive resources . Requests for private water-use facilities would not be considered.

	<ul style="list-style-type: none"> Possible conversion of former agricultural area into native warm season grass management Re-establish or re-mark boundary
Potential Partners	<ul style="list-style-type: none"> None identified

Parcel 2 – (143.01 acres)

RLMP Allocation: Zone 4, Natural Resource Conservation

This parcel is known as Damron Ridge and receives a low amount of public use, other than for hunting. The parcel is accessed via Evans Road and is gated for walk-in access only. There is a small gravel parking lot at the gate. Current TVA information indicates that this parcel does not have sensitive resources. Requests for private water-use facilities would not be considered.

Table 4-2. Parcel Information

Potential Partners	<ul style="list-style-type: none"> None identified

Parcel 3 – (7.44 acres)

RLMP Allocation: Zone 7, Shoreline Access

This parcel fronts Beech Hill Subdivision and another sales tract privately developed for residential use. Beech Hill Subdivision was jointly developed by TVA and TERDA. Both residential areas have a history of residential permitting in accordance with TVA's SMP. The parcel consists of land entirely below the 895-foot contour. Current TVA information indicates that this parcel does not have sensitive resources. Water-use facilities have been permitted on this parcel and future requests for private water-use facilities could be considered.

Parcel 4 – (373.34 acres)

RLMP Allocation: Zone 6, Developed Recreation

This parcel consists of six noncontiguous tracts and five islands that make up the Tims Ford State Park (TFSP). The majority of the amenities are located off of Mansford Road at what is considered the main section of the TFSP. In this section, the visitor center, park office, cabins, golf course, Lakeview Marina, Recreation Complex, picnic area, biking and hiking trails, and campground is located. Anderton Branch ramp and Lakeview ramp are also included in this parcel. Other TDEC ramps are parceled separately.

Current TVA information indicates that this parcel may have sensitive resources. Requests for use of TVA lands and associated water-based structures to support developed recreation purposes could be considered, consistent with the terms of the existing or future public recreation agreements.

Potential Partners	TDEC, Friends of Tims Ford State Park

Parcel 5 – (42.26 acres)

RLMP Allocation: Zone 4, Natural Resource Conservation

This parcel consists of two noncontiguous tracts on either side of Lost Creek Heights Estates. This parcel serves as a buffer between backlying agricultural uses and residential uses. This parcel receives a low amount of informal public use. This parcel can only be accessed by boat. Current TVA information indicates that this parcel does not have sensitive resources. There are existing facilities on this parcel that may be permissible as grandfathered facilities. Additionally, a 1984 agreement allows three additional facilities on the parcel between markers 6-57 and 4-63, under specific circumstances previously prescribed by TVA. Requests for additional private water-use facilities would not be considered.

Parcel 6 – (16.61 acres)

RLMP Allocation: Zone 7, Shoreline Access

This parcel consists of two noncontiguous tracts that front privately developed residential areas including Lee Gray Subdivision, Lost Creek Heights Subdivision and Hasty Hollow Subdivision. These subdivisions abut TVA at a straight-line boundary and have a history of residential permitting in accordance with TVA's SMP. Current TVA information indicates that this parcel does not have sensitive resources. Water-use facilities have been permitted along the shoreline, and future requests for private water-use facilities could be considered.

Parcel 7* – (0.85 acres)

RLMP Allocation: Zone 7, Shoreline Access

This parcel fronts a conservation easement managed by Lake Escape Homeowners Association. Current TVA information indicates that this parcel does not have sensitive resources. TVA will continue to consider community water-use facilities on this parcel, in

accordance with the terms of the conservation easement; however, please see Appendix C for more information and potential options for parcels encumbered with conservation easements. Individual water-use facilities will not be considered on this parcel.

Parcel 8* – (13.80 acres)

RLMP Allocation: Zone 7, Shoreline Access

This parcel is one of five that was identified in the 2000 RLMP by TDEC to develop for residential purposes for disposal as recommended by Tennessee Public Chapter No. 816. Current TVA information indicates that this parcel does not have sensitive resources.

This land is currently undeveloped but does have some of the infrastructure in place necessary to develop for residential use. If TDEC chooses to develop the property, the parcel will be subject to the same two additional conditions as originally established in the 2000 RLMP. The State of Tennessee has already transferred a buffer area to TVA to ensure that one of those conditions has been met. The other condition is that only community facilities can be considered at designated locations due to resource concerns. Community facilities will be required to meet TVA requirements and regulations for items such as size of facility, community lot, and homeowner's association requirements. Individual water-use facilities would not be considered.

Parcel 9 – (0.22 acres)

RLMP Allocation: Zone 5, Industrial

This parcel is associated with the water intake that serves the Jack Daniels Distillery and the City of Lynchburg/Moore County. Current TVA information indicates that this parcel does not have sensitive resources. Requests for the use of TVA lands and associated water-based structures to support industrial purposes could be considered.

Parcel 10 – (187.16 acres)

RLMP Allocation: Zone 4, Natural Resource Conservation

This parcel consists of seven noncontiguous tracts in the back of Lost Creek, mostly north or northeast of Lost Creek Road from which the parcel can be accessed along with Ray Burton Road on the northern end of the parcel. This parcel receives a medium amount of informal public use. Current TVA information indicates that this parcel may have sensitive resources. There are existing facilities on this parcel that may be permissible as grandfathered facilities. Requests for additional private water-use facilities would not be considered on the parcel.

Parcel 11 – (7.85 acres)

RLMP Allocation: Zone 2, Project Operations

This parcel makes up three existing road rights-of-way. A small portion of Tanyard Hill Road, a large length of Lost Creek Road, and a currently unnamed road to serve an undeveloped TDEC tract that may be developed in the future for residential development. Current TVA information indicates that this parcel may have sensitive resources. Requests for private water-use facilities would not be considered.

Parcel 16 – (19.47 acres)

RLMP Allocation: Zone 7, Shoreline Access

This parcel fronts Ridgeville Subdivision and consists of land entirely below the 895-foot contour. This parcel was jointly developed by TVA and TERDA where some lots were sold with rights for water-use facilities. It has a history of residential permitting in accordance with TVA's SMP. Current TVA information indicates that this parcel does not have sensitive resources. Water-use facilities have been permitted along the shoreline, and future requests for private water-use facilities could be considered.

Parcel 33 – (5.66 acres)

RLMP Allocation: Zone 6, Developed Recreation

This parcel consists of land solely below the 895-foot contour and fronts a public access area owned and managed by TDEC. The amenities include a public launching ramp, paved parking, and courtesy dock. The public access area is accessible from Ridgeville Road. A transmission line crosses this parcel, but not in a place that would interfere with activity at the launching ramp. Current TVA information indicates that this parcel may have sensitive resources. Requests for use of TVA lands and associated water-based structures to support public recreation purposes could be considered.

Parcel 35 – (9.21 acres)*RLMP Allocation: Zone 7, Shoreline Access*

This parcel fronts Hide-A-Way Subdivision which has a history of residential permitting in accordance with TVA's SMP. The southern end of the subdivision was developed by TERDA and consists of TVA lands solely below the 895-foot contour, but the remainder of the subdivision was privately developed and abuts TVA at a straight-line boundary. A transmission line crosses through the middle of the parcel. Current TVA information indicates that this parcel may have sensitive resources. Water-use facilities have been permitted along the shoreline, and future requests for private water-use facilities could be considered. However, any proposed facilities near the transmission line could be subject to additional conditions.

Parcel 36 – (157.37 acres)

RLMP Allocation: Zone 4, Natural Resource Conservation

This parcel consists of three noncontiguous parcels, mostly on the left descending bank of Turkey Creek. The parcel receives a low amount of public usage. The parcel can be accessed from Turkey Creek Loop or from the water. A transmission line crosses the parcel near Overlook Circle. Current TVA information indicates that this parcel does not have sensitive resources. There are existing facilities on this parcel that may be permissible as grandfathered facilities. Requests for additional private water-use facilities would not be considered on the parcel.

Parcel 46* – (19.76 acres)

RLMP Allocation: Zone 7, Shoreline Access

This parcel is one of five that was identified in the 2000 RLMP by TDEC to develop for residential purposes for disposal as recommended by Tennessee Public Chapter No. 816. Current TVA information indicates that this parcel may have sensitive resources on this parcel.

This land is currently undeveloped but does have some of the infrastructure in place necessary to develop for residential use. If TDEC chooses to develop the property, the parcel will be subject to the same two additional conditions as originally established in the 2000 RLMP. The State of Tennessee has already transferred a buffer area to TVA to ensure that one of those conditions has been met. The other condition is that only community facilities can be considered at designated locations due to resource concerns. Community facilities will be required to meet TVA requirements and regulations for items such as size of facility, community lot, and homeowner's association requirements. Individual water-use facilities would not be considered.

Parcel 48 – (170.91 acres)

RLMP Allocation: Zone 4, Natural Resource Conservation

This parcel consists of nine noncontiguous tracts of TVA land below the 895-foot contour and fronts TWRA's Owl Hollow Mill Wildlife Management Area (WMA). The WMA covers area on both the left and right banks of the Elk River, covering a wide span of the central part of Tims Ford Reservoir. This parcel receives a high amount of public use. Current TVA information indicates that this parcel may have sensitive resources on this parcel. There are existing facilities on this parcel that may be permissible as grandfathered facilities. Requests for additional private water-use facilities would not be considered on the parcel.

Parcel 59 – (17.73 acres)

RLMP Allocation: Zone 4, Natural Resource Conservation

This parcel consists of six noncontiguous tracts in the back of Winchester Springs Branch. Three tracts are accessible by Old Tullahoma Road and three tracts are only accessible by water. The parcel receives a low amount of public use. Current TVA information indicates that this parcel does not have sensitive resources. Requests for private water-use facilities would

not be considered.

Parcel 65 – (5.82 acres)

RLMP Allocation: Zone 7, Shoreline Access

This parcel fronts Pine Bluff Subdivision and consists of TVA land solely below the 895-foot contour. This subdivision was developed by TERDA. Some lots were sold with rights for water-use facilities and it has a history of residential permitting in accordance with TVA's SMP. Current TVA information indicates that this parcel may have sensitive resources. Water-use facilities have been permitted along the shoreline, and future requests for private water-use facilities could be considered.

Parcel 67* – (12.55 acres)

RLMP Allocation: Zone 7, Shoreline Access

This parcel is one of five that was identified in the 2000 RLMP by TDEC to develop for residential purposes for disposal as recommended by Tennessee Public Chapter No. 816. Current TVA information indicates that this parcel does not have sensitive resources.

This land is currently undeveloped but does have some of the infrastructure in place necessary to develop for residential use. If TDEC chooses to develop the property, the parcel will be subject to the same two additional conditions as originally established in the 2000 RLMP. The State of Tennessee has already transferred a buffer area to TVA to ensure that one of those conditions has been met. The other condition is that only community facilities can be considered at designated locations due to resource concerns. Community facilities will be required to meet TVA requirements and regulations for items such as size of facility, community lot, and homeowner's association requirements. Individual water-use facilities would not be considered.

Parcel 68 – (10.34 acres)

RLMP Allocation: Zone 4, Natural Resource Conservation

This parcel contains a unique bluff and will serve as a visual and vegetative buffer if a residential development is ever constructed on Parcel 67. Currently there is little access to the parcel from the land or the water so there is low public use of the parcel. Current TVA information indicates that this parcel does not have sensitive resources. Requests for private water-use facilities would not be considered.

Parcel 69 – (17.35 acres)

RLMP Allocation: Zone 7, Shoreline Access

This parcel fronts Lee Ford Estates and Lakeview Estates each of which have a history of residential permitting in accordance with TVA's SMP. Lee Ford Estates were developed by TERDA and the abuts TVA land at the 895-foot contour. Lakeview Estates were privately

developed and abuts TVA at a straight-line boundary. Current TVA information indicates that this parcel may have sensitive resources. Water-use facilities have been permitted along the shoreline, and future requests for private water-use facilities could be considered.

Parcel 70 – (8.56 acres)

RLMP Allocation: Zone 2, Project Operations

This parcel consists of two noncontiguous tracts, one located on each side of the Elk River. Both tracts contain the road right-of-way for Old Tullahoma Road (Highway 130). Additionally, the western tract also contains the infrastructure associated with the water intake for Winchester Utilities. TERDA conveyed land and easement rights to the Winchester Board of Public Utilities (Board) in 1968 at this location specifically for operation of a public water intake facility. Current TVA information indicates that this parcel may have sensitive resources. Requests for private water-use facilities would not be considered; however, requests for applications to upgrade or replace the existing water intake facility could be considered.

Potential Partners	<ul style="list-style-type: none"> • None identified

Parcel 71 – (3.08 acres)

RLMP Allocation: Zone 6, Developed Recreation

This parcel was placed in Developed Recreation as it previously has received a high amount of informal public use and would be a good location for a small public park. However, the parcel is not adequate in size or resources to be developed for commercial recreation. The parcel is accessible from Old Tullahoma Road (Highway 130). Current TVA information indicates that this parcel does not have sensitive resources. Requests for use of TVA lands and associated water-based structures to support public recreation purposes could be considered.

Parcel 72 – (8.83 acres)

RLMP Allocation: Zone 7, Shoreline Access

This parcel consists of two noncontiguous tracts of existing residential lands with a history of residential permitting in accordance with TVA's SMP. One tract is an unplatted residential area abutting TVA straight-line property. The other tract is Elklure Subdivision which was jointly

developed by TERDA and TVA and some lots were sold with rights for water-use facilities. The TVA land abuts Elklure at the 895-foot contour. Current TVA information indicates that this parcel may have sensitive resources. Water-use facilities have been permitted along the shoreline, and future requests for private water-use facilities could be considered.

Parcel 77 – (78.22 acres)

RLMP Allocation: Zone 4, Natural Resource Conservation

This parcel consists of five noncontiguous tracts. The parcel includes tracts in Eastbrook Hollow and tracts along the Elk River, including a large peninsula in Acklen Bend. The parcel can be accessed from Lockmiller Road and receives a medium amount of public use. That access is walk-in only as there is a gate on Lockmiller Road preventing vehicular access. Current TVA information indicates that this parcel does not have sensitive resources. There are existing facilities on this parcel that may be permissible as grandfathered facilities. Requests for additional private water-use facilities would not be considered on the parcel.

Parcel 85 – (22.10 acres)

RLMP Allocation: Zone 7, Shoreline Access

This parcel fronts private development subdivisions including Rock Creek West, Pineview Peninsula, Argyle Estates, Hillwood Estates, and Wild Geese Landing. These subdivisions all abut a TVA straight-line boundary and all have a history of residential permitting in accordance with TVA's SMP. Current TVA information indicates that this parcel may have sensitive resources. Water-use facilities have been permitted along the shoreline, and future requests for private water-use facilities could be considered.

Parcel 87 – (57.54 acres)

RLMP Allocation: Zone 4, Natural Resource Conservation

This parcel is located at the back of Rock Creek and consists of two noncontiguous tracts. Much of the parcel is surrounded by farmland and thus serves as an important vegetative buffer.

However, the southern portion along Honey Lane is now adjacent to a residential development. The parcel is only accessible via water. There is a low amount of public use on the parcel due to the lack of public access. Current TVA information indicates that this parcel may have sensitive resources. There are existing facilities on this parcel that may be permissible as grandfathered facilities. Requests for additional private water-use facilities would not be considered on the parcel.

Parcel 89 – (18.48 acres)

RLMP Allocation: Zone 7, Shoreline Access

This parcel abuts residential areas including Taylor Creek West, Westwood Shores, Timberlake, and Lakeside Estates, all with a history of residential permitting in accordance with TVA's SMP. Taylor Creek West was jointly developed by TERDA and TVA and some lots were sold with rights for water-use facilities. The TVA land abuts Taylor Creek West at the 895-foot contour. The remainder of the residential subdivisions were privately developed and abut a TVA straight-line boundary. Current TVA information indicates that this parcel may have sensitive resources. Water-use facilities have been permitted along the shoreline, and future requests for private water-use facilities could be considered.

Parcel 95 – (4.96 acres)

RLMP Allocation: Zone 6, Developed Recreation

This parcel is the Dennis Parm Panter Park managed by the City of Estill Springs (City) and is accessible from Park Street. The majority of this parcel consists of TVA land only below the 895-foot contour which has been historically managed for public recreational purposes. TVA is proposing a small addition to the lands managed for recreation where TVA lands adjoin City lands at a straight-line boundary and the City already manages the lands for public recreation. There are no plans to develop the TVA lands at this time. The amenities at the park consist of

sports fields, a fishing pier, playground equipment, and a picnic pavilion. A TVA substation is also present on the backlying land. Current TVA information indicates that this parcel may have sensitive resources. Requests for use of TVA lands and associated water-based structures to support public recreation purposes could be considered.

Parcel 111* – (2.43 acres)

RLMP Allocation: Zone 7, Shoreline Access

This parcel was formerly allocated as Zone 8 (Conservation Partnership). Current TVA information indicates that this parcel does not have sensitive resources. Community water-use facilities may be considered on the parcel. Please see Appendix C for more details about what may be considered on this parcel. Individual water-use facilities will not be considered on this parcel; however, there are existing facilities on this parcel that may be permissible as grandfathered facilities.

Parcel 112 – (3.07 acres)*RLMP Allocation: Zone 7, Shoreline Access*

This parcel fronts Murray Lake Estates and consists of land entirely below the 895-foot contour. This subdivision was jointly developed by TERDA and TVA where some lots were sold with rights for water-use facilities, and it has a history of residential permitting in accordance with TVA's SMP. Current TVA information indicates that this parcel does not have sensitive resources. Water-use facilities have been permitted along the shoreline, and future requests for private water-use facilities could be considered.

Parcel 115 – (17.18 acres)

RLMP Allocation: Zone 3, Sensitive Resource Management

This parcel sits along the shoreline north of Bell Acres Subdivision and Camp Riva. The parcel is only accessible by water and the backlying property owners. The eastern area close to Bell Acres Subdivision does receive a medium amount of public use, but the western side receives a low amount of public use. Current TVA information indicates that this parcel may have sensitive

resources. Requests for private water-use facilities would not be considered.

Parcel 121 – (117.92 acres)

RLMP Allocation: Zone 4, Natural Resource Conservation

This parcel sits at the confluence of Boiling Fork Creek and the Elk River. It fronts the City of Winchester sewage treatment plant and is situated between a residential area on the Elk River side and Winchester City Park on the Boiling Fork Creek side. The parcel can be accessed from Lees Ford Lane on the northern end and Silver Fox Lane on the southern end. The parcel receives a medium amount of public use. Current TVA information indicates that this parcel may have sensitive resources on this parcel. Requests for private water-use facilities would not be considered.

Parcel 122 – (89.87 acres)

RLMP Allocation: Zone 6, Developed Recreation

This parcel is the Winchester City Park and consists of four noncontiguous tracts and two islands. This parcel is accessible from Old Tullahoma Road and Old Estill Springs Road. Amenities include baseball and softball facilities, walking trails, tennis courts, pavilions, a boat launching ramp, two handicapped accessible fishing piers, children's playground, frisbee golf, and camping facilities. At the eastern and western ends of the parcel, TVA only owns below the 895-foot contour and TDEC owns the immediate backlying land. However, the majority of the park area is owned in fee by TVA and is managed in coordination with the City of Winchester through an easement agreement. Current TVA information indicates that this parcel may have sensitive resources. Requests for use of TVA lands and associated water-based structures to support recreation purposes could be considered.

Parcel 136 – (5.25 acres)

RLMP Allocation: Zone 6, Developed Recreation

This parcel is the site of a community park known as Oak Street Park that was originally constructed by TERDA and is now managed by the City of Winchester. The park is accessed

from South Oak Street and has park benches, picnic tables, and a parking area. The City of Winchester also maintains wastewater lines on the parcel. Current TVA information indicates that this parcel may have sensitive resources. Requests for use of TVA lands and associated water-based structures to support recreation purposes could be considered.

Parcel 137 – (25.05 acres)

RLMP Allocation: Zone 4, Natural Resource Conservation

This parcel consists of three noncontiguous tracts in Boiling Fork Creek between Twin Creeks Marina and Lynch Subdivision. TVA only owns below the 895-foot contour on the middle tract. TDEC sold the backlying land in recent years and it has been developed for residential use. The other two tracts are also adjacent to residential areas but are adjacent to TVA at a straight-line boundary. Under the TVA Land Policy, these residential areas are not eligible for private water-use facilities because there are no deeded rights or rights by policy for private water-use facilities and there is no history of residential permitting. The largest tract (the tract adjacent to Twin Creeks Marina) has dealt with multiple encroachments in recent years and multiple control measures have been installed such as signs, tree plantings, and re-establishment of boundary to help reduce the number of issues incurred. This tract can be accessed by North Vine Street where a gate has been installed to encourage walk-in access only on TVA property. The other two tracts are only accessible from the water. This parcel receives a high amount of public use. The City of Winchester also maintains wastewater lines on the parcel.

Current TVA information indicates that this parcel does not have sensitive resources. There are existing facilities on this parcel that may be permissible as grandfathered facilities. Requests for

additional private water-use facilities would not be considered on the parcel.

Parcel 140 – (3.03 acres)

RLMP Allocation: Zone 7, Shoreline Access

This parcel fronts two noncontiguous tracts of residential areas. These residential areas are not platted subdivisions but they adjoin TVA at a straight-line boundary and have a history of residential permitting in accordance with TVA's SMP. The City of Winchester also maintains wastewater lines on the parcel. Current TVA information indicates that this parcel may have sensitive resources. Water-use facilities have been permitted along the shoreline, and future requests for private water-use facilities could be considered.

Parcel 141 – (76.61 acres)

RLMP Allocation: Zone 6, Developed Recreation

This parcel has both public and commercial recreation components all of which can be accessed from Highway 50 (Lynchburg Road). The public recreation component is the Dry Creek Day Use Area (also known as Dry Creek Beach) which has a swim beach area, picnic pavilions and picnic tables, playground equipment, volleyball court, and restroom facilities. It is managed by Franklin County. There is also a public launching ramp with two lanes and a courtesy pier and large parking area on the parcel.

The commercial component is known as Twin Creeks Marina and Resort. This component has a marina, RV campground, boat rentals, and restaurant. A distribution line runs across the parcel in a southwestern direction across Dry Creek.

Current TVA information indicates that this parcel may have sensitive resources. Requests for use of TVA lands and associated water-based structures to support recreation purposes could be considered.

Parcel 143 – (47.94 acres)

RLMP Allocation: Zone 4, Natural Resource Conservation

This parcel consists of three noncontiguous tracts in Dry Creek south of the Highway 50 bridge. TVA only owns below the 895-foot contour in the northeast section of the parcel. TDEC sold the backlying land in recent years and it has been developed for residential use. The other two tracts are adjacent to TVA at a straight-line boundary. The TVA lands front mainly residential areas on the eastern side of the parcel and mainly agricultural lands on the western side of the parcel with more industrial and commercial lands in the southernmost section. Under the TVA Land Policy, these areas are not eligible for private water-use facilities because there are no

deeded rights or rights by policy for private water-use facilities and there is no history of residential permitting. The parcel is accessible by water or by foot through parcels 142 and 146. This parcel receives a low amount of public use. Current TVA information indicates that this parcel may have sensitive resources. Requests for private water-use facilities would not be considered.

Parcel 148 – (15.71 acres)

RLMP Allocation: Zone 7, Shoreline Access

This parcel fronts Dripping Springs Subdivision and consists of TVA land solely below the 895-foot contour. This was a TVA and TERDA jointly developed subdivision sold with deeded rights for water-use facilities, and it has a history of residential permitting in accordance with TVA's SMP. There is a TVA transmission line that runs through the subdivision, primarily affecting community areas. Current TVA information indicates that this parcel may have sensitive resources. Water-use facilities have been permitted along the shoreline, and future requests for private water-use facilities could be considered. However, any water-use facilities proposed near the transmission lines may be subject to additional conditions or restrictions.

Parcel 149 – (7.89 acres)

RLMP Allocation: Zone 2, Project Operations

This parcel consists of six noncontiguous tracts. It is the road right-of-way for Matthew Branch Road and the right-of-way for a TVA transmission line running northeast to southwest along the parcel. The area under the transmission line, as surrounded by a Zone 4 parcel, will be managed in conjunction with the surrounding TVA land. Current TVA information indicates that this parcel does not have sensitive resources. Requests for private water-use facilities would not be considered.

Parcel 150 – (33.76 acres)

RLMP Allocation: Zone 6, Developed Recreation

This parcel is the part of the Tims Ford State Park and is the Fairview Campground and Fairview Public Launching Ramp. Locally and historically, both areas are also referred to as Devils Step. The island just offshore from the launching ramp is also part of this parcel. The areas are accessible by Fairview Campground Road and Fairview Road. Amenities at the campground include campsites with electric, water, and sewer. The campground also includes a dump station and a bathhouse. The launching ramp area includes a ramp with a courtesy pier and a fishing pier. Current TVA information indicates that this parcel may have sensitive resources. Requests for use of TVA lands and associated water-based structures to support recreation purposes could be considered.

Parcel 151 – (37.97 acres)

RLMP Allocation: Zone 7, Shoreline Access

This parcel fronts Fanning Bend Subdivision which adjoins TVA at a straight-line boundary approximating a contour. This is a subdivision originally developed by TDEC and subject to additional conditions as imposed by the 2000 RLMP. The State of Tennessee has already transferred a buffer area to TVA to ensure that one of those conditions has been met. The other condition is that only community facilities can be considered at designated locations due to resource concerns. Current TVA information indicates that this parcel may have sensitive resources. Community facilities have already been permitted at Fanning Bend, but any additional community facilities will be required to meet TVA requirements and regulations for items such as size of facility, community lot, and homeowner's association requirements. Individual water-use facilities would not be considered.

Parcel 152 – (22.97 acres)

RLMP Allocation: Zone 4, Natural Resource Conservation

This parcel consists of four noncontiguous tracts on either side of Hopkins Point Subdivision. This parcel fronts mainly agricultural uses and the parcel provides a useful vegetative buffer to filter out pollutants from runoff. The parcel can only be accessed by water and receives a low amount of public use. Current TVA information indicates that this parcel does not have sensitive resources. Requests for private water-use facilities would not be considered.

Parcel 160 – (86.21 acres)*RLMP Allocation: Zone 4, Natural Resource Conservation*

This parcel forms a peninsula just north of Tims Ford Dam and Narrows Subdivision. It is accessible from Cline Ridge Road and there is a gate on TVA property for walk-in access. The parcel receives a medium amount of public use. Current TVA information indicates that this parcel may have sensitive resources. Requests for private water-use facilities would not be considered.

Table 4-160. Parcel Information

Location Component and Public Involvement Opportunities	Parcel Specific Information
County, State	Franklin, Tennessee

Location Component and Public Involvement Opportunities	Parcel Specific Information
Topographic Map (Sheet No. and Quadrant)	80NE
TVA C-Stage Map Numbers	1, 3
Stream Mile and Bank	Elk River Mile 133.6-138.1L
Land Use/Land Cover	Mixed forest, Managed grasslands, Deciduous forest
Known Dispersed Recreation Opportunities	Primitive camping, Hunting, Wildlife observation
Current Agreements/Commitments	<ul style="list-style-type: none"> Existing license for grasslands and agricultural lands management
Potential Projects	<ul style="list-style-type: none"> Removal of invasive and/or exotic species Conversion of old fields to native warm season grasses
Potential Partners	<ul style="list-style-type: none"> None identified

CHAPTER 5. PREPARERS

Chellye L. Campbell

Position: Senior Specialist, Land Policy

Education: B.S., Biology

Experience: 26 years in Planning and Managing Land

Involvement: Deed interpretation and Land Policy guidance

Tyler D. Ferguson

Position: Senior Specialist, 26a Policy

Education: B.S. Wildlife and Fisheries Science

Experience: 13 years in Land Management and Section 26a Permitting

Involvement: 26a Policy and interpretation

S. Clay Guerry

Position: Specialist, Recreation Strategy

Education: M.S., Zoology; M.S., Parks, Recreation and Tourism Management; B.S. in Biology

Experience: 24 years in Recreation Planning and Natural Resource Management

Involvement: Planning Team and Recreation Management

James Franklin Hill

Position: Program Manager, Reservoir Land Use and Permitting

Education: B.S., Biology

Experience: 18 years in Land Management and Section 26a Permitting

Involvement: Planning Team and Residential and Industrial Properties Management

Kerry David Nichols

Position: Archaeologist, B

Education: B.A., Political Science; M.A., Anthropology; Ph.D, Anthropology

Experience: 29 years in Archaeology

Involvement: Planning Team and Cultural Resources/Archaeology

Damien J. Simbeck

Position: Senior Program Manager, Natural Resource Management

Education: B.S., Professional Biology; M.S., Zoology

Experience: 13 years in Lands Management, 21 in Water Quality

Involvement: Planning Team and Natural Resource Management

Derek T. South

Position: Recreation Agreement Specialist

Education: B.S., Professional Geography

Experience: 13 years in Section 26a Permitting and Recreation Permitting

Involvement: Planning Team and Recreation Management

Lesley M. Webb

Position: Senior Specialist, Reservoir Lands Planning

Education: M.S., Biology; B.S., Biology

Experience: 18 years in Land Management and Section 26a Permitting (6 years in Lands Planning)

Involvement: Document preparation, Project Manager, and Preparation of Geographic Information Systems Mapping

Kelvin W. Young

Position: Watershed Representative

Education: M.S., Plant and Soil Science, B.S. Forestry

Experience: 14 years in Natural Resource Management, Forest Management, and Wildland/Prescribed Fire

Involvement: Planning Team and Natural Resource Management

GLOSSARY

Acre	A unit of measure of land area equal to 43,560 square feet.
Comprehensive Valleywide Land Plan	The Comprehensive Valleywide Land Plan (CVLP) was set forth in the 2011 Natural Resource Plan to guide resource management and administration decisions on the approximately 293,000 acres of TVA-managed lands around 46 reservoirs. It established the allocation ranges of land available for each land use allocation zone (Project Operations, Sensitive Resource Management, Natural Resource Conservation, Industrial, Developed Recreation, and Shoreline Access). The Natural Resource Plan was updated in 2020 and the CVLP allocation percentages were updated by the TVA Board of Directors in 2017.
Cultural resources	Archaeological, historic, and architectural resources
Dam reservation	Lands generally maintained in a park-like setting by TVA to protect the integrity of the dam structure, hydroelectric facilities, and navigation locks. The reservation also provides for public visitor access to the TVA dam facilities and recreation opportunities, such as public boat access, bank fishing, camping, picnicking, etc. Hunting is typically not allowed on dam reservations.
Deciduous	Vegetation that sheds leaves in autumn and produces new leaves in the spring.
Dispersed recreation	Recreation opportunities that are passive and unconfined that occur on TVA managed lands not associated with developed facilities. In addition, dispersed recreation opportunities may occur on areas with highly concentrated or seasonally intensive use, as well as, on parcels of spatially non-contiguous land.
Embayment	A bay or arm of the reservoir.

Emergent wetland	Wetlands dominated by erect, rooted herbaceous plants, such as cattails and bulrushes.
Endangered species	A species in danger of extinction throughout all or a significant part of its range. Endangered species recognized by the Endangered Species Act or similar state legislation have special legal status for their protection and recovery.
Environmental Policy	A TVA-Board approved policy that communicates guiding principles to lead TVA successfully in the reduction of its environmental impact while continuing to provide reliable and competitively priced power to the Valley.
Floodplain	Any land area susceptible to inundation by water from any source by a flood of selected frequency. For purposes of the National Flood Insurance Program, the floodplain, as a minimum, is that area subject to one percent or greater chance of flooding (100-year flood) in any given year.
Forest	Vegetation having tree crowns overlapping, generally forming 60 to 100 percent cover.
Grasslands and Agricultural Lands Management	Some parcels or portions of parcels designated for other purposes or uses may also be suitable for interim agricultural licensing. These parcels have been identified using the criteria contained in TVA's agriculture instruction. Normal tenure for a TVA agricultural license is five years. Land with extreme erosion potential may not be licensed for agricultural use unless erosion and sediment controls, including the use of best management practices, can be successfully implemented. Further investigation and/or mitigation of adverse impacts to natural or cultural resources may be required prior to approval of license agreements.
Land Policy	A TVA Board-approved policy that guides retention, disposal, and planning interests in TVA real property.
Mitigation	An action that either will result in avoidance or an effect or cause the results of an activity to be minor in significance.

Natural areas	Ecologically significant sites, lands set aside for particular management objectives, and lands that contain sensitive biological, cultural, or scenic resources. The TVA natural area program includes small wild areas, habitat protection areas, wildlife observation areas, and ecological study areas.
Plan tract	A numbered parcel of TVA-fee owned land that has been assigned, through the reservoir land planning process, an allocation to guide future land use decisions.
Riparian	Related to or located on the banks of a river or stream.
Shoreland	The surface of land lying between the minimum winter pool elevation of a TVA reservoir and the maximum shoreline contour.
Shoreline	The line where the water of a TVA reservoir meets the shore when the water level is at the full summer pool elevation.
Shoreline access rights	TVA land encumbered with deeded or implied rights held by adjacent property owners. The deeded or implied rights allow individuals to construct water-use facilities upon receipt of TVA's written approval of plans.
Single use parcel allocation methodology	This current planning methodology allocates land into broad categories or "zones" including Zone 1 (Non-TVA Shoreland), Zone 2 (Project Operations), Zone 3 (Sensitive Resource Management), Zone 4 (Natural Resource Conservation), Zone 5 (Industrial), Zone 6 (Developed Recreation), Zone 7 (Shoreline Access).
Threatened species	A species threatened with extinction throughout all or a significant portion of its range or territory. Threatened species recognized by the Endangered Species Act or similar state legislation have special legal status for their protection and recovery.
Wetlands	As defined in TVA Environmental Review Procedures, "Wetlands are those areas inundated by surface or groundwater with a frequency sufficient to

	support and under normal circumstances do or would support a prevalence of vegetation or aquatic life that requires saturated or seasonably saturated soil conditions for growth and reproduction. Wetlands generally include swamps, marshes, bogs, and similar areas such as sloughs, potholes, wet meadows, mud flats, and natural ponds.”
Wildlife management area	Land and/or water areas designated by state wildlife agencies, such as the Tennessee Wildlife Resources Agency, for the protection and management of wildlife. These areas typically have specific hunting and trapping regulations as well as rules regarding appropriate uses of these areas by the public.

Appendix B – Comparison of Parcel Allocations by Alternative

Appendix B

Comparison of Parcel Allocations by Alternative

Tims Ford Reservoir

Under Alternative A – No Action Alternative, TVA would continue to use the 2000 Tims Ford Reservoir Land Management and Disposition Plan (2000 RLMP).

Under Alternative B, C, and D, of the 4,685.5 acres on Tims Ford Reservoir, there are no proposed allocation changes to 4,125.27 acres or 88.0 percent; all allocation changes involve 560.18 acres or 12.0 percent. Of the 560.18 acres, TVA would allocate 94.75 acres or 2.0 percent to reflect existing land use agreements or commitments. The remaining 465.43 acres (9.9 percent) involve parcel allocations that are not based on existing land use agreements or commitments. The allocation changes acreage includes all Zone 8 (Conservation Partnership) acreage in all three options.

Please note that parcel numbers indicate proposed parcel numbers rather than parcel numbers referenced in the 2000 RLMP and any previously approved allocation changes would be accounted as if approved in the 2000 RLMP.

¹Some parcels from the original 2000 RLMP have been separated into smaller portions or combined with pieces of other parcels to show comprehensive consideration of parcel land use. A footnote has been used to indicate where only a portion of a parcel may have been affected by a proposed allocation change.

See Tables below:

**Appendix C – Updates to Former Zone 8 (Conservation Partnership)
Parcels and Associated Criteria**

Appendix C

Updates to Former Zone 8 (Conservation Partnership) Parcels and Associated Criteria

Zone 8 Background

During the initial lands planning process on Tims Ford Reservoir in 2000, a new land use Zone 8 (Conservation Partnership) was created in response to public comments seeking both additional residential access to the reservoir and increased community involvement in watershed protection. Many public comments reflected that TERDA had indicated to private individuals that their property would be eligible for a private water-use facility and the 2000 draft land management plan had allocated their land for Zone 4 (Natural Resource Conservation) which would not be eligible to apply for a private water-use facility. Rather than disregarding these comments due to lack of landrights and residential permitting history, TVA created Zone 8 parcels as a compromise to recognize the history with TERDA and work with those communities to ensure that the developments would not have a detrimental impact to the reservoir.

Zone 8 parcels were identified as narrow strips of public shoreland (and other specific criteria) where a wider shoreline buffer zone (100 feet from the 895-foot contour) could be established to benefit the environment and where TERDA would have typically considered a license agreement for a water-use facility. To ensure long-term maintenance and enhancement of the 100-ft buffer zone, a conservation partnership easement over the privately owned land would be required. This private conservation easement would be provided to TVA in exchange for TVA's consideration of requests for community water-use facilities on the adjacent public land. The TVA Board-approved 2000 RLMP outlines certain criteria and conditions for approving community facilities on Zone 8 parcels. Originally 51 parcels were approved. One parcel was reallocated after it was discovered that it met the criteria for Zone 7 allocation.

Proposed updates to former Zone 8 parcels

After review of the current criteria, existing permits and applications, public comments, and all

historical information, TVA is proposing the following updates to Zone 8 parcels under Alternative B as the preferred alternative. Other alternatives being considered as part of this review are included in the next section. All proposed updates at this point are in draft form and may be altered before final approval.

- 1) TVA would no longer use the Zone 8 (Conservation Partnership) allocation. This is an allocation unique to Tims Ford and does not align with the CVLP. TVA is proposing to allocate the existing Zone 8 parcels as either Zone 4 or Zone 7 (with restrictions) depending on the unique circumstances of each parcel.
 - a) Zone 8 parcels are proposed for reallocation to Zone 4 if in TVA's sole discretion: 1) the parcel cannot support one or more community or shared facility, 2) access/eligibility is limited by the presence of road or other encumbrance, or 3) all eligible properties have already been accommodated with a permit in some manner (this includes through grandfathered facilities).
 - b) Other parcels are proposed for reallocation to Zone 7 but will also have an orange line along the boundary between TVA and private property representing that additional restrictions will be in place. Specific information about those restrictions continues below.
- 2) Conservation easements would no longer be required. Any new Section 26a permits will be subject to Section 26a regulations on vegetation management.
 - a) Any existing conservation easement holder will be allowed to apply to abandon the existing conservation easement, but there is no requirement to do so. To begin the abandonment process, a land disposal application and a \$5000 application fee is required. As part of this process, TVA will need to know if there are any plans to change the subdivision plat or the community facilities. However, if conservation easements are left in place, existing facilities can remain as long as they match the existing permit, continue to follow the conservation easement, and are in good condition.
 - b) If conservation easement holders choose to abandon the conservation easement, facilities will have to comply with the updated guidance. Facilities may have to be altered (such as to a smaller footprint) to comply with the new guidance. The conservation easement holder should come to TVA early in the decision-making process

to determine how a potential abandonment may affect their existing facility.

3) Community facilities will be required.

- a) TVA would allow one single slip in a community facility per 100 feet of shoreline (double slips would count as two slips) but would not approve more slips than there are lots or tax parcels adjoining the TVA parcel boundary (not including the community lot). If the community lot is limited by shoreline length, cove width or any other factors that TVA, in its sole discretion, would determine necessary to limit the number of slips or type of facility, other types of facilities such as a T-pier or launching ramp could be requested but would be limited to a maximum of 2,000 square feet.
- b) Multiple community facilities could be considered if there are multiple community access lots. All slips approved on a parcel would be counted to arrive at a total count of slips for section (a). A community could not request both slips and another type of facility such as a T-pier but could request slips on one community lot and a launching ramp on another community lot. The size of the community lot would need to be suitable for the type of facility requested (e.g. if requesting a ramp, enough space to turn a truck and trailer around to back in).
- c) Requests would have to be submitted by and managed by a state-chartered homeowners' association if more than four lots or tax parcels have an interest in a parcel. Shared docks with shared agreements could be considered in limited circumstances where four or less lots or tax parcels are involved. A community access lot would not be required for a shared dock.
- d) Requests for riprap or one launching ramp per land planning parcel would be considered if submitted by a HOA or shared dock owners.
- e) Individual steps, access corridors or other private facilities will not be considered. However, if there is a site-specific reason requiring additional access, TVA can consider at its sole discretion.
- f) Not all adjacent property owners need to participate for an application to be submitted. However, the HOA would need to accommodate them if they should choose to participate at a later date. Section 26a applications should reflect the number of property owners participating at the time of submission.

- g) If an individual owns the entirety of the property behind a parcel, a 1,000 square foot facility can be permitted (only one single slip permissible). If the property is later subdivided, the facility must then become a shared or community facility depending on how many times it is subdivided, and a new application must be submitted to TVA. If an individual owns one tax parcel behind two TVA parcels, only one 1,000 square foot facility will be permitted.
- 4) Existing grandfathered facilities (with a permit matching the existing facility and in the current homeowner's name) will be allowed to remain on the parcel and will not be required to participate in a community facility. However, if they desire to remove the facility in the future and participate in the community facility, the HOA must allow for that situation. This situation only applies to a limited number of parcels.

This option was identified as the preferred alternative due to its flexibility in implementation which allows TVA to accommodate the intent behind Zone 8 parcels while aligning requirements with current regulations.

Other alternatives

Alternative C

- 1) TVA would continue to use the Zone 8 (Conservation Partnership) allocation. However, not all parcels previously allocated as Zone 8 would continue to be allocated as Zone 8.
 - a) Parcels where TVA would not be able to grant a conservation easement due to onsite issues such as structures or roads or parcel-specific site constraints, in TVA's sole discretion, would be reallocated to Zone 4 (Natural Resource Conservation). Parcels could also be reallocated to Zone 4 because private property owners do not adjoin TVA property due to roads or roads would block access to the water. Parcels where backing property owners have been accommodated through other means may also be reallocated to Zone 4.
 - b) Parcels where conservation easements and community facilities are still feasible will continue with the Zone 8 allocation.

- 2) Conservation easements would still be required. However, TVA would allow for 100-foot average conservation easement depth (from 895-foot contour) to allow for some flexibility in how the conservation easement is surveyed. No additional facilities would be allowed on TVA or the conservation easement other than the water-use facility and access corridor.
- 3) Community facilities would still be required. The size and number of community facilities would remain the same (one or two facilities per parcel at 2,000 square feet per facility). One single slip will be allowed per tax parcel. All backlying property owners would still need to participate (except grandfathered facilities). Community lots will be required to be owned and maintained by a state-chartered HOA
- 4) If an individual owns behind the entirety of a parcel, then a conservation easement would still be required, but a 1,000 square foot facility would be permissible (one slip). If the property was later subdivided, the facility would then need to be managed by a HOA and become a community facility and a new Section 26a application submitted to TVA.
- 5) Existing grandfathered facilities would be allowed to remain (if the existing facility matches the current permit and is in the current homeowner's name) and would not be counted in the 2,000 square feet for community facilities.

Alternative D

- 1) TVA would no longer use the Zone 8 (Conservation Partnership) allocation. This is an allocation unique to Tims Ford and does not align with the CVLP. In order to better align with the CVLP, TVA is proposing to allocate the existing Zone 8 parcels as either Zone 4 or Zone 7 (with restrictions) depending on the unique circumstances of each parcel.
 - a) Zone 8 parcels are proposed for reallocation to Zone 4 if the parcel cannot support multiple individual facilities and/or community facilities in TVA's discretion, if access/eligibility is limited by the presence of road or other encumbrance, or if all eligible properties have already been accommodated with a permit in some manner (this includes through grandfathered facilities).
 - b) Other parcels are proposed for reallocation to Zone 7 but will also have an orange line along the boundary between TVA and private property representing that additional restrictions will be required.

- 2) Conservation easements would no longer be required. Any new Section 26a permits will be subject to Section 26a regulations on vegetation management.
 - a) Any existing conservation easement holder will be allowed to apply to abandon the existing conservation easement, but there is no requirement to do so. To begin the abandonment process, a land disposal application and a \$5000 application fee is required. As part of this process, TVA will need to know if there are any plans to change the subdivision plat or the community facilities. TVA will need to ensure that existing or proposed facilities will fit under the new guidance.
- 3) Community facilities would no longer be required. Facility size would be divided dependent on the amount of parcel shoreline owned with the maximum size as outlined in the 2000 RLMP (either 2000 or 4000 square feet depending on the parcel).
 - a) For example, a parcel has 800 feet of shoreline, Owner Y has 80 feet of shoreline or 10%. Owner Y can have 10% of the facility size (2000 square feet for this parcel). Owner Y can have a 200 square foot facility. TVA would be the sole arbiter in determining the length of shoreline allocated to each property owner. Property owners could submit documentation such as surveys to help inform TVA's decision-making process, but the shoreline footage will not be determined at the property boundary, but at the shoreline (888-foot normal summer contour) and will therefore not match the property boundary.
 - b) No individual facility can exceed 1,000 square feet (Section 26a regulations), no matter how much shoreline footage is owned. One facility per tax parcel.
 - c) Community facilities could be considered in accordance with TVA Section 26a regulations.
- 4) Existing grandfathered facilities (with a permit matching the existing facility and in the current homeowner's name) will be allowed to remain on the parcel. Any existing facilities without such documentation are highly encouraged to contact TVA as soon as possible to see if the facility is permissible.
