

TVA's Proposals come with the Cleanest Energy in the Region

TVA represents a significantly cleaner option for Memphis.

TVA's energy supply almost twice as clean as MISO

In addition to TVA's clean energy percentage being almost twice that of MISO, TVA's renewable generation was 15% compared to only 11% for MISO in 2019.

- TVA has **more utility-scale renewable generation than anyone else in the region**, and the release of the 2020 Renewable RFP is expected to enhance this position
- Working together – TVA and MLGW have been cleaning the air in Memphis for years
- We have already rolled out solar solutions at Sharp Manufacturing, Nike and Millington NSA and a long-term TVA and MLGW partnership will empower MLGW (and Memphis) with the ability to **address local needs**
- Above what we have already accomplished, **we can do more together**, and MLGW does not need to leave TVA to further cut greenhouse gas emissions attributed to Memphis.
- TVA and MLGW can chart a path to get Memphis an **additional 10%** renewable energy as early as 2026
